Short profile

Hamburger Sparkasse AG – Haspa for short – offers a wide range of financial services for private individuals and businesses, serving the more than three million people living in the Hamburg Metropolitan Region.

Haspa is a savings bank committed to serving the public interest. HASPA Finanzholding, a legal entity formed under old Hamburg law, holds 100 percent of the shares in Hamburger Sparkasse AG. HASPA Finanzholding is obligated by its articles of association and bylaws to fulfil the mission entrusted to the savings bank.

Haspa is one of the few independent savings banks in Germany. It is also a member of the Hanseatischer Sparkassen- und Giroverband (Hanseatic Savings Banks Association - HSGV), Hamburg, and the Verband der freien Sparkassen (Association of Independent Savings Banks), Frankfurt am Main. Through HSGV, Haspa is affiliated with the Deutscher Sparkassen- und Giroverband e. V. (German Savings Banks Association) in Berlin and Bonn, and therefore fully included in the comprehensive guarantee scheme of all German savings banks. The German Savings Banks Finance Group has an institutional guarantee scheme that has been recognised as a deposit guarantee scheme under the German Deposit Guarantee Act (Einlagensicherungsgesetz).

Management

Foreword of the Board of Management

Ladies and Gentlemen,

We live in very challenging times, with the invasion of Ukraine ongoing, the conflicts in the Middle East unresolved and the geopolitical landscape in turmoil. Erratic US foreign and trade policy decisions are also generating widespread uncertainty. Worldwide political and economic upheaval is prompting companies to restructure their global supply chains. It is also difficult to predict how the geopolitical sea change will affect international trade, growth and prosperity. The enormous uncertainty over future political and economic developments weighed on people and businesses in 2025 and is likely to persist in 2026.

Dependable partnerships are vital for resilience and success in uncertain times. Ever since our foundation in 1827, we have been there as a savings bank to help our customers make financial provisions for challenging times and invest their money safely and profitably. While we previously focused on traditional savings accounts, many of our customers now invest in securities, too. Regularly investing savings in securities and diversifying assets among different asset classes is vital in an uncertain environment that can lead to volatility in the capital markets.

Haspa is a reliable partner for its customers, helping them to make forward-looking and well-founded investment and pension decisions. For example, renovating buildings to enhance energy efficiency and investing in renewable energy sources can mitigate energy price increases, strengthen energy supply security, and contribute to climate action for the benefit of future generations. For many people, a good life means owning your own home. We develop suitable financing solutions for our customers – including those involving public funding – to make sure they can realise this dream quickly, even in turbulent times.

Against the backdrop of this challenging environment, we are quite satisfied with the result of our operations in 2025. Our earnings will allow us to build up additional equity to meet increasing regulatory requirements and enable future credit expansion. Since we want to continue supporting the Hamburg metropolitan region's growth as well as its economic and social transformation towards sustainable and climate-friendly lifestyles and businesses. We want to continue supporting the people and businesses in the Hamburg metropolitan region in the future by offering comprehensive services and personal advice at our branches, online and by phone.

We thank our customers and business partners for the trust they have placed in us. We would also like to express our sincere thanks to our employees for their exceptional commitment in what has been a demanding environment. We would also like to thank the Supervisory Board for their confidence and support, and the Works Council for their constructive collaboration.

Hamburg, 24 February 2026

The Board of Management

Board of Management

Birte Quitt,

born in 1971, holds a banking diploma (Bankkauffrau) and a degree in business administration (Diplom-Betriebswirtin). She has been a member of the Board of Management of Hamburger Sparkasse AG since 2024.

Support

Management report of Hamburger Sparkasse AG for the year ended 31 December 2025

The tables presented in the management report may contain rounding differences.

1. Fundamental information about the company

Ever since our foundation in 1827, we have been a reliable partner and promoter of the Hamburg Metropolitan Region, providing comprehensive support for both private and corporate customers. In particular, we provide opportunities for safe and interest-bearing investments of savings and other funds, promote the savings mentality and capital formation of broad sectors of Hamburg's population and serve to fulfil the credit needs of the local economy, especially taking SMEs into account.

We assist people and companies in their financial planning and in safeguarding the future. Our wide range of services and personalised advice can be accessed quickly at all times from around 100 branches, our direct advisory service via telephone, mail and video chat, and our online services.

Organisationally, our private customer and corporate customer business has been consolidated across several regions, with a combined management team in each of these regions. The branches in the regions have extensive local decision-making authority. In the reporting year, we decided to reduce the number of regions from seven to six by dissolving the Northern Region, effective 1 January 2026, to enhance efficiency in retail sales and optimise our regional structure. As a result of this structural adjustment, the affected branches were allocated to the surrounding regions.

We are rounding off our range of services with specialist expertise. For high net worth customers we offer Haspa Private Banking. Our Haspa StartUp Center is the first port of call for start-up entrepreneurs, and for large real estate or enterprise customers we have our special industry expertise. With in-house expert knowledge and our alliance partners, we support our customers in their transactions both in and outside Germany.

Haspa wants to keep growing and expand its market share across all customer groups. To do this, we want to place an even greater focus on our customers and continue to position ourselves as the digital bank with the best branches in our competitive environment. We see commercial potential in areas such as promoting residential construction, as creating living space is one of the most important tasks for Hamburg, a growing metropolis.

Haspa's aim is to provide its customers with strong support as they navigate the economic and social shift towards greater sustainability and climate change mitigation. Leveraging generative artificial intelligence, we also want to strengthen our innovative capabilities to step up the development of products and services that meet our customers' needs and to open up new areas of business. Against a backdrop of demographic change and an increasing shortage of skilled workers, we want to enhance our appeal as an employer.

As we believe that motivated employees are a key factor for future success, we rely on flat hierarchies and teams and develop innovative, customer-focused solutions with strong teamwork. The move to the Deutschlandhaus building on Gänsemarkt as the location of our central departments allows us to work together in a more modern and interconnected way. Our room and workstation design, combined with the adoption of an activity-based work model has created the foundation for our employees to communicate even more effectively, collaborate creatively and foster relationships.

2. Report on economic position

2.1 Macroeconomic and sector-specific environment

Slight economic growth in an environment of great uncertainty

The macroeconomic environment in 2025 was marked by a very high degree of uncertainty over political and economic developments. Despite challenging conditions, the German economy was able to achieve slight growth after two years of recession. According to initial calculations by the Federal Statistical Office, price-adjusted gross domestic product rose by 0.2 percent year-on-year in 2025. Economic output contracted by 0.5 percent in 2024 and by 0.9 percent in 2023.

In the first six months of 2025, Hamburg's price-adjusted gross domestic product increased by 1.1 percent year-on-year according to Northern Statistical Office calculations. As a result, this figure was well above the national average. Also based on calculations made by the Northern Statistical Office, Germany's price-adjusted GDP growth rate was 0.0 percent in the first six months of 2025. For the full year, we project that Hamburg's price-adjusted gross domestic product performed significantly better than in Germany as a whole. We also came to this conclusion because the Hamburg Chamber of Commerce's business barometer in the fourth quarter shows an improvement in the surveyed companies' assessment of their current business situation compared to the previous quarter.

Inflation close to the European Central Bank's target

Inflation rates in Germany and the eurozone in 2025 were close to the European Central Bank's (ECB) 2.0 percent target. According to calculations by the Federal Statistical Office, consumer prices in Germany increased by an annual average of 2.2 percent year-on-year in 2025, the average inflation rate in 2024 was also 2.2 percent.

Based on the Harmonised Index of Consumer Prices considered by the ECB, which differs in its calculation from the consumer price index of the Federal Statistical Office, due among other things to the weighting of the groups of goods, Germany's annual average inflation rate was 2.3 percent, while euro area inflation stood at 2.1 percent.

In 2025, the ECB initially continued its interest rate cuts it had begun in June 2024, lowering key rates by 25 basis points at a time on four occasions between January and June 2025. The ECB reduced the interest rate on its deposit facility – the key rate used to manage its monetary policy strategy – from 3.0 percent to 2.0 percent during this period. In the second half of 2025, the ECB left key interest rates unchanged given that inflation was close to its target figure.

The trend in the lending industry is marked by the shift in interest rates, regulation and digitalisation efforts

We estimate that the normalisation of interest rate levels following a period of extremely low interest rates helped improve the financial situation in the lending business. Tight capital adequacy regulations and strict liquidity requirements as a result of intensified regulation continue to present challenges for the lending industry.

In our opinion, progressing digitalisation including the use of artificial intelligence is triggering accelerated structural change in the financial services industry, as the entry of young, technology-focused companies and financial services offered by large technology corporations according to our observations have increased the competitive intensity within the financial services market.

2.2 Course of business

Environment dominated by great uncertainty

The war in Ukraine, conflict in the Middle East and the US government's erratic foreign and trade policy triggered great uncertainty in 2025, weighing on people and businesses. Thanks to our sustainable business model focused on the needs of private and commercial customers, we were able to achieve success in our business with customers in what has been a highly challenging environment.

Number of current accounts and call money accounts up

Haspa manages around 1.5 million current accounts (giro accounts) and call money accounts. Just under 814,000 – more than three out of four of the just over 1.0 million private current account holders – went with the “HaspaJoker” account, Hamburg’s advantage account. Besides extensive banking services, these customers also benefit from a multitude of value-added services. Specifically, the number of “S Tagesgeld” call money accounts and private current accounts in particular increased in 2025. The number of customers who have opted for our “MäuseKonto” account for children and the benefits associated with it is slightly below the level of the end of the previous year.

Quite satisfactory business development

In light of the highly challenging environment described earlier, we are quite satisfied overall with our business performance in the reporting period. We are pleased that both our liabilities to customers and our securitised liabilities increased again. In our opinion, this is attributable not just to the higher level of interest rates seen in recent years but also to the trust placed in us by our customers. On the assets side of the balance sheet, receivables from customers rose overall following the negative trend seen in previous year, with credit commitments, especially in connection with real estate financing, increasing considerably. Overall, our balance sheet structure continued to be clearly dominated by the customer business. We also further expanded our strategic capital investment business.

Interest contribution from the customer business fell as a result of the ECB’s interest rate policy, whereas interest contributions obtained from maturity transformation and proprietary securities investments increased. In our loan portfolio, we again recorded higher loan loss provisions in the financial year now ended, which considerably exceeded our targets due to an increase in global valuation allowances.

Although, as in previous years, persistently stringent regulatory requirements and charges continued to have a negative impact, the successful completion of our investments in our forward-looking projects had an offsetting effect. The revaluation of pension provisions also had a positive effect after significantly weighing on earnings in prior years. Overall, we are quite satisfied with our result for the year of € 150 million.

Transfer of pension commitments to pension fund

At the end of the year, Haspa transferred its current pension obligations and the pension benefits that had already vested to a non-insurance-type pension fund to become more independent of the effects of the revaluation of pension provisions in the income statement. This pension fund was funded through the payment of a one-time amount, in the context of which pension provisions fell sharply year-on-year. These separated capital resources can be used to pursue a more targeted investment strategy. The pension commitments as such remain unaffected by this. Haspa retains secondary liability for the obligations in accordance with section 1 (1) sentence 3 German Occupational Pensions Improvement Act (Gesetz zur Verbesserung der betrieblichen Altersversorgung – BetrAVG).

Development of the most important key performance indicators

We measure customer focus using the Net Promoter Score (NPS). It is determined through regular customer surveys and calculated as the difference between the percentage of highly satisfied customers who would recommend Haspa and the percentage of customers who are critical of Haspa. The survey is conducted on a relational basis across all customer segments and the segment figures are weighted and included in the overall company figure. We are pleased to report that the average level in 2025 was up somewhat on the previous year and also slightly above our expectations.

“Corporate energy” (organisational energy) is the force with which a company works and purposefully puts things in motion. The strength of its organisational energy indicates the extent to which a company has mobilised its potential to pursue core objectives. Corporate energy is measured through company-wide employee surveys. It is captured using different items for the individual energy states. The difference between (the mean) positive and negative energy indicates the level of corporate energy. Energy can be between -100 and +100 (standardised values), with the results required to be assessed accordingly. In 2025, it stood at 56, which was above the prior-year value of 54 and also slightly above the target.

To measure innovation, we especially use the cross-savings bank sector Digital Minimum standards (DMS) benchmarking. Every four months, this nationwide report measures the savings bank's level of digitalisation in order to indicate how well positioned the respective institution is on digitalisation matters. This action-oriented report shows the potential for improvement in three dimensions – “savings bank”, “customers” and “employees” – so that specific measures to systematically and successfully introduce, implement and use digital solutions and innovations of the German Savings Banks Finance Group can be inferred and initiated. Customers' external perception and employees' internal perception of digital innovation are also measured. The results were down slightly on the previous year and somewhat below our target.

The most important financial performance indicator is “available net income”, which equates to the “result before allocation to contingency reserves” in accordance with sections 340f and 340g German Commercial Code (Handelsgesetzbuch - HGB). At € 271 million, this was up on the prior-year figure of € 219 million and well above the projected figure. It is the result from ordinary activities after deduction of tax expense and plus the changes in contingency reserves in accordance with sections 340f and 340g HGB. This performance indicator reflects the generally quite satisfactory performance in the past financial year, which allows us to build up additional equity to meet increasing regulatory requirements and facilitate future credit expansion in the Hamburg Metropolitan Region.

Other developments in the past financial year are described below in the section on net assets, financial position and results of operations.

2.3. Net assets, financial position and results of operations

2.3.1. Net assets and financial position

Assets	2025 € million	2024 € million	abs.	rel.
Cash reserve	710	507	+ 203	+ 40%
Receivables from banks	8,938	10,398	- 1,459	- 14%
Receivables from customers	35,870	35,588	+ 282	+ 1%
Securities	10,797	9,609	+ 1,188	+ 12%
Trading portfolio	28	85	- 57	- 67%
Other assets	570	504	+ 66	+ 13%
Total assets	56,914	56,691	+ 223	+ 0%

Equity and liabilities	2025 € million	2024 € million	abs.	rel.
Liabilities to banks	3,721	4,125	- 404	- 10%
Liabilities to customers	41,108	40,334	+ 774	+ 2%
Securitized liabilities	6,314	5,770	+ 544	+ 9%
Trading portfolio	1	4	- 3	- 83%
Provisions	677	1,633	- 956	- 59%
Equity and fund for general banking risks	4,210	3,934	+ 276	+ 7%
Other equity and liabilities	883	890	- 8	- 1%
Total equity and liabilities	56,914	56,691	+ 223	+ 0%

Total assets increased

At € 56.9 billion, total assets were up € 0.2 billion on the previous year's reporting date, with both receivables from customers, and liabilities to customers and securitised liabilities showing an increase. Proprietary securities investments also increased overall, including a continuous expansion of strategic capital investments.

Central bank deposits, which are presented in receivables from banks, fell year-on-year. Due to Haspa's highly adequate liquidity position, the pension fund's capital resources of € 0.9 billion could be provided from central bank deposits. The transfer of pension commitments therefore resulted in a significant decrease in pension provisions.

In addition, further allocations were made to our equity capital and we increased the fund for general banking risks in accordance with section 340g HGB. Liabilities to banks include pass-through loans – especially of Kreditanstalt für Wiederaufbau. These are reported as a component of the lending business on the assets side of the balance sheet and at just under € 2.6 billion were slightly lower than the figure recorded at the end of the previous year.

In the context of the funding and investment structure, we consider Haspa's liquidity situation comfortable on account of the large portfolio of liabilities from the customer business. Here, receivables from customers are mainly offset by deposits by private and business customers as well as own issues, and the market for Pfandbrief securities offers considerable potential as a sustained source of liquidity for longer-term funding requirements. We have created further issuing potential with a public cover pool and issued a public Pfandbrief in benchmark format for the first time in 2025. For more information about compliance with regulatory ratios and the management of the liquidity situation, please refer to the risk report.

Total assets	in € billion
2021	59.9
2022	57.0
2023	59.6
2024	56.7
2025	56.9

Increased liabilities to customers

Liabilities to customers rose by € 0.8 billion to € 41.1 billion. This rise is due especially to deposits payable on demand, and more specifically to giro account deposits in particular. Savings deposits declined only slightly compared with the prior-year reporting date. Securitised liabilities increased by € 0.5 billion to € 6.3 billion, as issue volumes exceeded maturing securitised liabilities. Examples of particular note include the first launch of a benchmark social bond and the first public-sector Pfandbrief in benchmark format.

Higher customer receivables

Receivables from customers rose by € 0.3 billion to € 35.9 billion due to a renewed increase in credit demand. Customer loans continue to be made up mainly of residential construction loans and business loans. At € 6.5 billion, new loan approvals in the financial year ended were up considerably on the prior-year figure, mainly on account of real estate financing.

Increase in equity

Also in view of the European-influenced regulations on regulatory ratios that arose from the international Basel III framework, Haspa's equity increased further in the financial year, continuing the trend of the previous years. At the end of 2025, this amounted to just under € 3.2 billion, while the fund for general banking risks, which from a regulatory perspective is assigned to Common Equity Tier 1 capital, stood at just under € 1.1 billion after the addition made this year. The regulatory ratios relating to own funds are presented in the risk report section.

2.3.2. Results of operations

Income statement	2025 € million	2024 € million	abs.	rel.
Net interest income	892	885	+ 7	+ 1%
of which income statement items 1 and 2.	844	876	- 32	- 4%
of which income statement items 3 and 4.	47	9	+ 39	+ 451%
Net commission income	415	383	+ 32	+ 8%
Net income from financing activities	6	5	+ 1	+ 10%
Administrative expenses	820	828	- 9	- 1%
Other operating result	76	15	+ 62	+ 420%
Net revaluation gain/loss	- 257	- 192	- 66	+ 34%
Result from ordinary activities	312	269	+ 44	+ 16%
Tax expense	- 162	- 144	- 19	+ 13%
Result for the year	150	125	+ 25	+ 20%

Net interest income above prior-year level

Net interest income was up € 7 million on the prior-year level at € 892 million, significantly exceeding our projections. More specifically, contributions from the customer business were down on the prior-year period due especially to lower contributions from customer deposit business as a result of the trend in interest rates, with contributions on the assets side being lower too. In contrast, contributions obtained from maturity transformation and proprietary securities investments increased. One-time effects arising especially from the derivatives portfolio in the course of maturity transformation resulted in a positive impact of around € 25 million in 2025, which was slightly up from the previous year.

Net commission income up year-on-year

Net commission income rose by € 32 million year-on-year to € 415 million, thereby slightly exceeding our original expectations. The prior-year figure was surpassed due mainly to higher income from securities business, with lending and insurance business as well as clearing transactions also generating higher contributions.

Net trading income positive

Trading activities serve to support our retail banking business; in particular they comprise gains and losses from securities trading for customers. The net income for the financial year was up slightly year-on-year. This result included an addition to the fund for general banking risks in accordance with section 340e HGB.

Administrative expenses below prior-year level

At € 422 million, personnel expenses were up by € 18 million on the prior-year figure and slightly higher than expected. As in the previous year, this figure includes expenses from additions to the pension provisions, although these were considerably lower than in 2024. At € 398 million in total, other administrative expenses, amortisation and write-downs of intangible fixed assets, and depreciation and write-downs of tangible fixed assets were down by € 27 million on the prior-year figure and slightly lower than the projected figure. The year-on-year decrease is due to one-off charges incurred in the previous year and the near completion of our investments in our forward-looking projects – in particular, in broadening our collaboration with the German Savings Banks Finance Group and expanding our digital offering.

Other operating result more favourable than in the previous year

The other operating result made a positive contribution of € 76 million, € 62 million higher than in the previous year and much more favourable than forecast. The increase is primarily attributable to positive effects arising on the revaluation of our pension provisions.

Net revaluation loss up year-on-year

Risk provisions in the lending business were at the projected level during the course of the year. At year-end, however, this was exceeded by a significant margin due to a specific adjustment to global valuation allowances in light of the current trend in the economic environment. We recorded only a marginal net revaluation loss on our proprietary securities investments due especially to the fact that interest rate-related revaluation effects arising on interest-bearing securities were only small in amount. The figure for the reporting period also includes provisions to cover as-yet unidentifiable risks in the lending business. Overall, the net revaluation loss is considerably up from the previous year and significantly higher than planned.

Result from ordinary activities up year-on-year

In a highly challenging environment, the result from ordinary activities at € 312 million was € 44 million higher than in the previous year and significantly higher than originally projected.

Tax expense up year-on-year

The tax expense payable rose by € 19 million year-on-year to € 162 million in the reporting period. It was negatively impacted especially by the higher result before tax. In addition continued marked differences between measurement requirements under commercial and tax law, particularly those relating to pension provisions.

Result for the year up on the prior-year figure

Overall year-on-year, we increased the result for the year in what is a highly challenging environment. This was the result of a significant year-on-year increase in income – other operating income in particular was higher due to revaluation effects and net commission income rose sharply, mostly in securities business – in combination with a simultaneous fall in expenses. Set against that, the net revaluation loss had a far worse impact than in the previous year. We are quite satisfied with business performance and the result for the year of € 150 million. The return on assets required to be disclosed in accordance with section 26a (1) sentence 4 German Banking Act – calculated as net profit over total assets – was 0.3 percent for Haspa at the end of the year.

3. Risk management and control system relevant to the financial reporting process

Effective internal control and risk management system safeguards the accounting process

Pursuant to section 25a (1) German Banking Act, overall responsibility for proper business organisation and the risk management integral to it rests with Haspa's Board of Management. As required by MaRisk, the Board of Management is supported by Compliance and Risk Management in this context. Among other things risk management comprises the implementation of internal control procedures consisting of an internal control system and an internal auditing system. Internal Audit is an integral part of Haspa's risk management and internal control procedures. It carries out its responsibilities autonomously and independently on behalf of the full Board of Management.

Risk management and the internal control processes also cover the accounting process. Accounting in turn comprises bookkeeping as well as preparation of both the annual financial statements and the management report. Each Haspa division is responsible for bookkeeping based on prescribed rules for account assignment. Most of the accounting systems and applications used were developed by Finanz Informatik GmbH & Co. KG. These are incorporated into the risk management system and the control processes.

The subcontracting process is controlled and monitored by the competent Comprehensive Bank Controlling division of Haspa. This ensures that the Organisation and Process Management division as a service-controlling unit is involved in the decision-making, management and monitoring processes, taking into account the legal foundations and optimum contract terms and contract contents for Haspa.

Organisationally all divisions tasked with accounting are separate from divisions responsible for marketing activities.

The rules for account assignment and the control processes pertaining to the bookkeeping as well as the preparation of the annual financial statements and the management report are specified in various process instructions. In particular these work instructions address the controls to be carried out in terms of reconciliations and the requisite documentation. All data related to the financial reporting process of Haspa is processed using IT systems which at all times are subject to access limitation, system activity logs, access controls, data backups and data protection.

Internal Audit directly or indirectly reviews the accounting related internal control and risk management systems based on a risk oriented audit plan. This also includes functional separation, data processing security, documentation of control actions and compliance with process instructions. The accuracy of our data processing programmes is ensured by means of strict separation of the development, testing and production systems and through a defined development process for software packages with the pertinent testing and release procedures. Introduction of new or amended parameters can only be placed in production within the scope of defined change management. In its reviews, Internal Audit verifies that these procedures are followed properly.

If the financial reporting process is carried out using centralised third-party data processing equipment, the pertinent providers are obligated under the general agreements closed with them to comply with all statutory and regulatory requirements relevant to the outsourced activities. Compliance with these statutory and regulatory requirements is monitored by the internal auditing departments of the given third-party providers as well as by Haspa's Internal Audit.

4. Risk report

Identification and assessment of material risks

In the regular risk inventory, the risks to which Haspa is exposed are identified and their materiality is assessed. Most of the material risks are assessed using appropriate quantitative measurement methods and managed as a whole in the analysis of the risk-bearing capacity. Any further risks that are not included in the analysis of the risk-bearing capacity are taken into based on additional key figures and control processes and are consequently also considered in key decisions.

Risk management focusing on risk-bearing capacity

Incurring risk associated with our business operations in a responsible manner is at the heart of all banking activity. The objective of risk management is to identify at an early stage and comprehensively measure, monitor and control risks that could jeopardise Haspa's success or even the continuation of the institution as a going concern. Ensuring an institution's risk-bearing capacity on an ongoing basis, under both the economic and the normative perspective, is an integral part of effective risk management.

The central element of the economic perspective is the present value risk-bearing capacity calculation with the aim of ensuring the continuity of operations over the long term. The risk-bearing capacity calculation compares against Haspa's economic capital (risk coverage potential) all risks that could have a material impact on Haspa's capital position from an economic perspective. Risk is measured using suitable value-at-risk models, with the measurement based on a standard confidence level of 99.9 percent and a holding period of one year. Under the economic perspective, risk-bearing capacity is assured if all material risks are covered by the risk coverage potential on an ongoing basis, taking into account separately defined management buffers.

For the economic perspective, the risks entered into are limited by defining risk limits for the individual types of risk, taking into account the risk coverage potential available. Starting in 2025, the net present value of Haspa's risk coverage potential has been calculated according to the standard provided by Sparkassen Rating und Risikosysteme GmbH (SR). This standard records the total portfolio of assets and liabilities, including off-balance sheet items. The risk coverage potential was between € 5.1 and € 5.8 billion during the reporting period; even amid volatile market conditions, it is at a comfortable level. We have also used the SR standard approach to calculate present value risks since 2025. The sum total of the risks entered into ranged between € 1.9 and € 2.6 billion during the year. Accordingly, to continuously ensure its risk-bearing capacity, Haspa not only complies with the risk limits but also maintained an appropriate level of free risk coverage potential, specifically € 2.8 to just over € 3.8 billion in the period under review. During the year, Haspa comfortably kept within the management buffers defined for this purpose.

Distribution of risks*	31.12.2024		31.12.2025	
Types of risk	Risk in € million	Limit in € million	Risk in € million	Limit in € million
Counterparty risk, customer business	395	560	343	600
Counterparty risk, proprietary business	61	250	70	250
Equity risk	25	35	25	35
Market risk	1,705	1,780	1,033	2,300
Funding risk	0	0	95	300
Operational risk	170	170	379	500
Total	2,357	2,795	1,944	3,985

* Risk figures for the 31 December 2024 and 31 December 2025 reference dates are not directly comparable due to the migration to SR and the associated changes in risk measurement methods, as a result of which year-to-year comparison of the risk figures is not permissible.

Under the normative perspective of the risk-bearing capacity concept, the focus is on complying with the relevant regulatory and supervisory requirements on an ongoing basis. The central element of the normative perspective is the capital planning process, which is carried out at least annually and covers a multi-year planning horizon.

Capital planning comprises an anticipated baseline scenario as well as complementary specific adverse scenarios and a interest rate sensitivity analysis. The baseline scenario assumes a balancing act in an environment marked by the current geopolitical risks. In this scenario, Europe is and will remain dependent on the USA and China. Monetary policy is driven by external circumstances and fiscal policy only responds to acute challenges, with limited scope to play a shaping role over the long term. When considering the adverse scenarios, particular attention was paid to the impact of a fragmentation of the West as a result of geopolitical escalation. In this case, increasing protectionism leads to a decline in global trade and developments inhibit innovation and reduce trend growth. A scenario involving a slump in property prices, interest rate sensitivities and ESG scenarios featuring flood risk and carbon pricing were also among the adverse scenarios given consideration. According to the results of the capital planning process, capital ratios are initially expected to fall in the baseline scenario in 2026 due to growth assumptions in the lending business and capital investment. In the course of capital planning, the defined thresholds are also observed by a clear margin in the adverse scenarios.

In addition, based on the normative perspective continual monitoring of regulatory capital requirements using internal thresholds, the intra-year forecasting process for the capital ratios and the regular performance forecast ensure the validity of the capital planning and compliance with supervisory requirements.

Haspa is subject to regulatory capital requirements primarily under the CRR, with the new capital adequacy rules (CRR III) applying from the start of 2025. Haspa also switched its regulatory reporting system to the systems of Finanz Informatik GmbH & Co. KG (FI) at the beginning of 2025. As at 31 December 2025, Haspa's total capital ratio applying the standard approaches was 15.7 percent and its Tier 1 capital ratio was 14.2 percent. Capital ratios are projected to decline in 2025, due in part to the impacts arising from the new capital adequacy rules.

The leverage ratio, which indicates an institution's exposures in relation to its own funds and is therefore based more on balance sheet figures, is around 7.2 percent and thus remained substantially higher than the minimum requirement. The increase in this key metric in 2025 results from the net income for the year generated in the previous year. The leverage ratio in particular reflects the high level of nominal capital of Haspa.

To ensure capital adequacy, stress tests are also performed on a regular basis. Stress testing enables Haspa to assess the impact of certain, internally defined scenarios on capital resources and liquidity. In the risk-bearing capacity calculation under the economic perspective, overarching stress tests analyse the scenarios of a severe economic downturn and a real property crisis triggered by an increase in interest rates, and ESG scenarios associated with physical and transition climate risks. Risk type-specific stress tests are also in place. Reverse stress tests are also regularly carried out on the basis of cross-risk type scenario analyses. These investigate the level of variance in certain risk variables as of which the bank's ability to continue as a going concern would no longer be guaranteed. The results of the stress tests are regularly compared with the risk coverage potential. In addition, the effects of different adverse developments are regularly examined under the normative perspective in the course of capital planning – including a liquidity outlook – and in the HASPA Group's recovery plan; this also includes an assessment of ESG risks. The HASPA Group also performs stress tests as specified by European supervisory authorities. In 2025, the HASPA Group took part in the EU-wide stress test in accordance with the requirements of the European supervisory authorities EBA and ECB. With a discount to the Common Equity Tier 1 capital ratio of considerably less than 3 percentage points in an adverse scenario, it achieved a very good result compared to other participants. This confirms the HASPA Group's conservative risk profile and solid capital base.

Overall, therefore, it has in place a comprehensive stress test programme covering various perspectives. The results of the stress tests performed do not indicate any threat to Haspa under the assumed conditions. Material risks are subject to continuous monitoring by means of suitable early warning systems that identify significant developments as quickly as possible, thus enabling timely countermeasures based on thresholds.

Ongoing endeavours to integrate ESG risks into risk management

ESG risks are defined as events or conditions arising from the environmental, social and governance (ESG) areas whose occurrence could have actual or potential negative effects on Haspa's net assets, financial position and results of operations as well as its reputation.

Haspa and the HASPA Group are generally exposed to ESG risks in the course of their business activities. The focus here is on climate-related and environmental risks, where the categories are physical risks (extreme weather events, long-term changes in climatic and environmental conditions) and transition risks (process of adjustment to a lower-carbon and more sustainable economy). However, social risks and governance risks are also included in the considerations for capture and control purposes. As risk drivers, ESG risks primarily affect the existing risk types and categories, with the effects of ESG risk drivers on counterparty risk of particular significance for Haspa's business model. In this context, ESG risk drivers can affect borrowers' probability of default and collateral values through various transmission channels. The extent of the necessary monitoring and control measures is aligned with the relevance of the ESG risk drivers in the individual risk type or category and the time horizon concerned (short-, medium- or long-term).

Their actual relevance is scrutinised more closely each year as part of the risk inventory. Generally speaking, the planning horizon and the average loan tenor are typically shorter than the time horizon in which the effects of climate change are likely to materially impact counterparties and collateral values. Therefore, Haspa also takes a forward-looking approach to managing ESG risks, which is why the ESG risk inventory considers different time horizons:

- Short-term perspective: time horizon of up to one year
- Medium-term perspective: time horizon of one to five years
- Long-term perspective: time horizon of five to at least ten years

Individual analyses may also extend beyond a ten-year period, however.

The ESG risk inventory showed that there are currently no indications that ESG risk drivers might result in a significant loss of assets over the short- and medium-term time horizon. For the long-term perspective, transition risks from the ESG risk drivers "greenhouse gas emissions" and "energy consumption" are of particular significance for credit risk, as a result of which these could potentially affect the ability to achieve strategic objectives and adhere to the risk appetite. The material ESG risk drivers identified in the long-term time horizon for credit risk are therefore included in the strategy process and are continuously monitored as part of the risk management approach in relation to ESG risks.

Moreover, for the economic and the normative perspective, Haspa also calculates ESG scenarios in accordance with the savings bank standard set by SR. These are guided by the science-based scenarios of the Network for Greening the Financial System (NGFS). The "flood risk" scenario is based on the NGFS Disasters and Policy Stagnation scenario and the "carbon pricing" scenario on the NGFS Sudden Wake-up Call scenario. According to the ESG scenarios performed, there are currently no risks to the business model. Our analyses showed that although these risks may be relevant, our business model is sufficiently resilient in relation to these risks. Since 2022, Haspa has been integrating risk indicators for ESG risks into the regular internal risk reporting in order to keep sight of the effects of ESG risk drivers. Among other things, these consider savings bank ESG scores of the lending portfolio, energy certificates of the real estate collateral portfolio, and the carbon footprints of the lending portfolio and proprietary transactions. The sustainability of the investment portfolio in customer business and the path of carbon prices are also monitored and assessed.

Among other things in the current reporting period, the internal stress test program was overhauled and the pool of data on ESG risks improved, in particular by collecting energy efficiency certificates. Moreover, the ESG risk inventory processes and the double materiality assessment processes under the CSRD were more closely interlinked and integrated into Haspa's strategy process.

Knowledge of the regional market and portfolio risk management limit credit risks

Haspa's credit risk stems from the lending business associated with private, real estate, enterprise and corporate customers. Our customer loan portfolio is broadly diversified and largely secured by mortgages. Risks in the customer business are taken within Haspa's area of operations, which is focused on the Hamburg Metropolitan Region. Haspa deliberately accepts the resulting regional concentration of risk, which is in conformity with Haspa's business and risk strategy.

Due not least to the large portfolio of loans secured by mortgages, there is also a concentration of risk in real estate transactions. Prices for residential properties in the Hamburg metropolitan region have recovered again in 2025, increasing moderately. These increases have a hedging effect here, which is also reflected in the rising recovery rates of recent years. Business secured by real estate continues to be secured by durable and recoverable collateral, with the ongoing repayments also playing a role in this context. Here, Haspa benefits from information advantages resulting from its knowledge of the local market and deliberately enters into the concentration of risk. The rating models used are calibrated to a one-year probability of default in a methodologically consistent way, using the DSGV master scale as a benchmark. The DSGV master scale is divided into 27 rating classes, 24 of which are for borrowers who are not in default, plus three default classes. Each class is assigned an average probability of default. The exposure-weighted cover for rating and scoring systems in the customer lending business is 98 percent, with 97 percent cover for the customer and proprietary business. Eighty-three percent of the business exposed to counterparty risk relates to investment-grade customers (with a rating of 5 or above). As of the reporting date, the following default probabilities and expected collateral proceeds were determined for customer and proprietary business:

Probabilities of default (PD) and expected collateral proceeds

Rating grade	Percentage of customers	Share of exposure	Expected proceeds from collateral	Exposure-weighted average PD
1 AAAA and 1 AAA	46.6%	15.0%	7.46%	0.01%
1 AA+ to 1 AA-	10.4%	21.8%	31.67%	0.02%
1 A+ to 1 A-	13.6%	18.8%	65.26%	0.03%
2 to 5	13.4%	27.1%	64.34%	0.10%
6 to 9	7.1%	12.5%	50.95%	0.41%
10 to 15	7.6%	2.3%	59.58%	2.72%
16 to 17	0.5%	1.2%	57.98%	100.00%
18	0.3%	0.3%	34.69%	100.00%
Customer business without grade	0.5%	0.9%	61.31%	N/A
Entire bank	100.0%	100.0%	46.89%	0.58%

To manage credit risk and incorporate the credit risk strategy into our operations, we have set lending standards and differentiated credit risk indicators that are monitored and reported on an ongoing basis.

The credit risk indicators (CRIs) used for management purposes in lending are set out in a policy and observed by both the front office and the back office. To monitor them, we use a limit system that incorporates a traffic light approach. The following CRIs have been specified: DSTI (debt service-to-income), LTVV (loan volume-to-value), rent DSCR (rent debt service coverage ratio), LTC (loan-to-cost), EBITDA leverage, total debt service coverage ratio, pre-marketing/pre-letting rate.

Regular credit monitoring using credit risk indicators with appropriate thresholds is carried out on a quarterly basis.

In terms of sectors, our loan portfolio is still largely concentrated on real estate and housing (32.4 percent) and private customers (25.5 percent).

Industry	Number of customers	Collateralisation rate	Exposure-weighted average PD	Share of exposure
Real estate and housing	7,915	75.9%	0.61%	32.38%
Private customers	518,257	64.9%	0.46%	25.53%
Services	42,314	53.1%	1.21%	13.28%
Lending and insurance	1,746	24.3%	0.22%	10.27%
Retail	11,085	31.6%	1.40%	5.31%
Public budgets	51	45.8%	0.02%	4.84%
Construction	6,180	49.7%	1.43%	3.48%
Other	10,001	40.6%	1.63%	4.91%

Loans are predominately secured by residential and commercial mortgages. In doing so, we use our regional market knowledge to avoid risk.

The potential loss arising from credit risk comprises the expected loss and the unexpected loss, with both components being considered when determining loan terms. The expected counterparty credit risk arises from the credit structure of the high-risk portfolio and is determined on the basis of ratings and probabilities of default. It reflects the annual amortisation and write-downs anticipated in the long-term capital. This expected loss is taken into account when conditions in the lending business are being set and is also factored into the risk provisions. We use the Credit Portfolio View developed by Sparkassen Rating und Risikosysteme GmbH to simulate the risk of unexpected counterparty defaults. At the end of the year, the credit risk for customer business amounted to € 343 million and for proprietary business to € 70 million. Haspa also determines a separate equity risk using a value-at-risk approach, which includes the risk of a loss triggered by a drop in an equity investment's value. The equity risk as at 31 December 2025 was € 25 million.

The internal rating procedures developed jointly with the German Savings Banks Finance Group offer tools that are tailored to our customer groups and continuously refined. The current scoring systems of the German Savings Banks Finance Group are used to assess creditworthiness and determine pricing in the private customer business. Rating procedures designed to assess credit ratings and determine risk-based pricing are used in our standard corporate customer business. Different procedures apply for small, mid-size and large corporate customers, professionals/freelancers as well as start-up entrepreneurs depending on the given company. A property transaction rating tool tailored to commercial property financing is used for commercial real estate commitments. Automated compact customer rating is additionally applied to enable targeted credit scoring of small corporate customers. The corresponding model of the Landesbank rating is used for project financing in the field of renewable energies.

Risk provisions are recognised using criteria defined on a case-by-case basis. On the whole credit risk is generally covered through appropriate risk provisions. We handle issuer risk and counterparty credit risk in both our securities investment and interbank business by limiting ourselves to trading partners with first-rate credit ratings as well as a widely diversified portfolio and a strict limit system. In the interbank money market business, we include a range of trading partners and thus avoid becoming dependent on individual market players. The counterparty credit risk is also limited through the high level of collateralisation in the derivatives business.

Capital market risks still shaped by geopolitical crises and lower key interest rates

For the money, capital and equity markets, 2025 was a year shaped by initial worries over political uncertainty and inflation expectations. After these created headwinds in the first half of the year, equity markets reached new record highs in the second half of the year despite the fact that geopolitical risks persisted. The DAX gained considerable ground again, rising to 24,490 points during the course of the year. Following a gain of 18.8 percent in 2024, this represents a performance of 23.0 percent in the past year.

Inflation in the eurozone continued to fall over the course of the year, opening up scope for the European Central Bank (ECB) to cut interest rates. ECB lowered its deposit rate in several steps from 3.0 percent at the beginning of the year to 2.0 percent at year-end.

The yield on ten-year Bunds, on the other hand, rose by 50 basis points to 2.86 percent over the course of the year. This put it near its annual high of 2.93 percent reached at the end of the first quarter. The US dollar weakened significantly against the euro, particularly in the first half of the year. After moving sideways in the second half of the year, it was trading at 1.17 US dollars to the euro at year-end.

Market price risk shaped by expansion of strategic capital investment

Market price risk is defined as the risk of loss resulting from changes in risk factors such as interest rates, credit spreads, share prices, real estate prices or currencies. In the case of options, a distinction is made between explicit and implicit options. In each case, these are included in the calculation within the risk categories concerned.

For present-value risk measurement, Haspa uses the variance-covariance approach, applying the delta-gamma model version with Cornish-Fisher quantile correction. Value-at-risk with a confidence level of 99.9 percent and a holding period of 250 trading days serves as a measure of risk. Risk quantification takes account of all relevant forms of market price risk; the resulting value-at-risk as at 31 December 2025 was € 1,033 million. In addition, extreme market movements are simulated at regular intervals by performing stress tests.

The special fund set up by the bank to pool strategic capital investments was gradually expanded. To this end, further investments were made in highly liquid bonds and in European and American equities, while also holding special real estate funds. The isolated risk of the strategic capital investments as part of market price risk was € 478 million as at 31 December 2025. To ensure liquidity at all times, securities with the best credit ratings are still held as direct investments; these were also expanded in the year now ended. There is also a special fund with highly liquid bonds (HQLA) that are eligible for inclusion in the regulatory liquidity coverage ratio (LCR).

Market risk arising from interest rates (interest rate risk) essentially results from the given loan commitment which tends to be of a longer term nature on the asset side, compared to borrowings which tend to run over a shorter term on the liabilities side. Money and capital market interest rates have an immediate effect on Haspa's bottom line. For the purpose of quantifying risk, all interest-bearing asset and liability transactions and off-balance sheet derivatives are considered. In the case of variable items with an indefinite fixed interest rate period or capital commitment, the cash flows are determined using theoretical scenarios. Loans with call options are included taking into account a modelled option exercise. We measure and control interest rate risk in a comprehensive manner using both periodic and net present value methods, with the present value interest rate risk as a component of market risk amounting to € 421 million as at 31 December 2025.

Haspa's market risk position is monitored on an ongoing basis and discussed regularly in greater depth and controlled with respect to money and capital market trends during Board of Management meetings. In addition, ad hoc meetings can be held as necessary to ensure appropriate action in case of rapid changes.

Country risks

Haspa's exposure to country risks generally originates in Germany due to its regional alignment as a retail bank. There is also a manageable level of investments outside Germany, primarily in European securities.

Low trading risks, as before

Haspa's considerable restraint in taking on equity and foreign exchange trading risk also reflects its alignment as a retail bank in the Hamburg Metropolitan Region. Most of our trading activities are customer initiated, and we only hold closed currency and option positions.

Operational risks integrated in risk management

Operational risk denotes the risk of losses caused by the inappropriateness or failure of internal processes, people and systems or by external events. Among others, this includes legal risks, model risks and risks related to information and communications technology (ICT risk), but not strategic risks or reputational risks. Operational risks can be found in all divisions and stem from general banking activities.

Operational risks are quantified in the risk-bearing capacity calculation using the OpRisk estimation method, a standard method developed by SR for the German Savings Banks Finance Group. This estimation method calculates the expected and the unexpected loss (value-at-risk) based on the institution's own loss history and the losses of other savings banks. At year-end, the value-at-risk calculated with a time horizon of one year and a confidence level of 99.9 percent was around € 379 million.

As part of its internal control system, Haspa has taken many steps to ensure flawless and smooth business procedures. Intragroup procedures and the functionality of technical systems are continuously adapted to both internal and external requirements. Operating processes are subject to a general guideline and process descriptions, and are monitored by Internal Audit.

Haspa has outsourced portions of its market support processes associated with its lending, deposit and services business to S-Servicepartner Norddeutschland GmbH (from 1 January 2026: S-Servicepartner Deutschland GmbH). Haspa Direkt Servicegesellschaft für Direktvertrieb mbH takes over call centre operations. Some of the payment processes are outsourced to Deutsche Servicegesellschaft für Finanzdienstleister (DSGF) and securities processing is outsourced to Deutsche WertpapierService Bank (dwpbank). Additionally, large parts of IT functions have been transferred to, among others, Finanz Informatik and DATAGROUP BIT. The interaction between outsourcing centres and Haspa with respect to the outsourced functions is subject to and governed by statutory and regulatory requirements using individual and interface-specific agreements. These arrangements have been tried and tested in the interaction between the different entities and are further expanded and refined on an ongoing basis.

Information technology security is one of the focal points in controlling operational risks. Detailed contingency plans are available for all IT functions. These contingency plans also include crisis management protocols as well as procedures designed to ensure uninterrupted business operations for time-critical processes or critical or important functions. Authorised access systems and control and monitoring processes guarantee the protection of confidential information against unauthorised read and write access. Extensive security systems such as firewalls, virus scanners and monitoring systems provide protection against external attacks.

Operational risks are also measured and managed by way of examining material scenarios and by analysing significant loss events.

Funding strategy and comfortable cash position limit liquidity risks

Liquidity risks may arise in the form of insolvency risk and funding risk. Insolvency risks arise when payment obligations cannot be fulfilled in time or to a sufficient degree. Funding risks arise if liquidity can only be obtained at higher spreads.

In addition to daily monitoring of liquidity risk indicators, the deposit structure and its development, being the largest driver of liquidity risk, is analysed in detail on a monthly basis. Future liquidity progress is also monitored and analysed in risk and stress scenarios over a horizon of the next 12 months in order to assess the overall liquidity risk situation. In these liquidity progress reviews, scenario-specific liquidity requirements resulting from contractual and modelled net cash outflows are contrasted with the potential liquidity available in each scenario, and a net liquidity position (NLP) is created for each maturity band. The survival period (SVP) is also calculated as a metric that specifies the time horizon until insolvency in each scenario. NLP and SVP thresholds are defined that reflect Haspa's risk tolerance. Compliance with these thresholds is monitored at least once a month so that timely control measures can be adopted as necessary. Haspa also creates a multi-year liquidity ratios outlook based on divisional planning under both expected and adverse conditions. This enables us to assess our liquidity needs for future maturities and manage cash flows accordingly.

A diversified, liquidity-focused capital investment consisting of highly liquid unencumbered assets as well as a supply of liquidity in central bank accounts is held as a buffer to cover any unexpected liquidity needs that may arise in the short term. In addition to a liquidity buffer to cover operational liquidity risks, managing the balance sheet structure is the key instrument for limiting any strategic liquidity risks that may arise in the long term. As a result, Haspa has a stable refinancing structure diversified across several channels. Our most important funding channel has always been the deposit business with our customers. Our customer structure gives us a stable level of deposits. Successfully launching Pfandbrief issues since 2006 has enabled Haspa to tap into the Pfandbrief market's vast potential as a source of liquidity.

We always significantly exceed statutory excess cover requirements for the mortgage and public collateral pools, which means Haspa has additional potential from issue planning to be able to cover unexpected liquidity needs. Rating agency Moody's assigns Haspa's Pfandbriefe an Aaa rating.

For years, Haspa has used unsecured long-term private placements as a further source of funding. Partly as a result of offering structured issues, Haspa has a good reputation among institutional customers and can tap this source of funding on a regular basis. Since April 2023, the bank has had its own issuer rating from rating agency Moody's so that it can extend the funding channels.

This rating enables it to issue unsecured bearer securities on the capital market in addition to Pfandbrief issues on the capital market. Haspa has held an issuer rating of "Aa2" with a "stable" outlook since December 2024. This rating reflects the high level of financial stability and creditworthiness. Among other factors, the rating is based on a solid capital position, a strong deposit base and a diversified funding structure. In February 2025, Haspa placed its first benchmark social bond with a volume of € 500 million. This was followed in October 2025 by the first public-sector Pfandbrief in benchmark format.

Access to the capital market is accompanied by opportunities to participate in the secured and unsecured money market. Thanks to the aforementioned reputation built among institutional customers, liquidity can also be obtained through this market at short notice and in large amounts.

The risk of loss resulting from increasing funding costs is quantified with respect to changes in liquidity spreads by way of a value-at-risk approach and taken into account in assessing risk-bearing capacity. For this present-value risk measurement, Haspa uses the variance-covariance approach, where this liquidity value-at-risk is calculated as a measure of risk for a confidence level of 99.9 percent and a holding period of 250 trading days. The liquidity value-at-risk as at 31 December 2025 was € 95 million. Over and above the value-at-risk calculation, extreme widening of liquidity spreads is simulated at regular intervals by performing stress tests.

The current and prospective requirements for the regulatory liquidity ratios – liquidity coverage ratio (LCR) and net stable funding ratio (NSFR) – are clearly being met. Both ratios, together with internal metrics, are an indication that Haspa has excellent liquidity. Early warning thresholds defined internally for complying with regulatory minimum liquidity requirements were always comfortably exceeded. At year-end, the LCR is 188 percent and the NSFR is 140 percent.

Risk assessment

No going-concern risks or risks with a material effect on Haspa's net assets, results of operations and liquidity were identified for the current year.

5. Report on expected developments – opportunities and risks

Stronger economic growth and inflation close to target

The very high degree of uncertainty over future political and economic developments will weigh on consumers and businesses in 2026. In Germany, the government programmes for investment in infrastructure and defence are likely to stimulate economic performance. We expect the growth in the German economy to increase year-on-year to 1.0 percent in 2026. Hamburg's economy will likely outperform the overall German economy.

We believe that factors such as labour shortages and trade conflicts will play a role in keeping inflation rates in Germany and the eurozone close to the ECB's target of 2 percent in 2026. Given that inflation is close to target, we expect the ECB to initially keep the key rate on hold at 2.0 percent in 2026. Key rates could be cut further in 2026 in the event of a slowdown in growth or a sharp uptick in the value of the euro, for example.

The very high degree of uncertainty over political and economic developments will likely shape developments in the capital markets and trigger volatility. The DAX is likely to move in the range of 21,000 to 26,500 points in 2026. We expect the yield on ten-year Bunds to be in a range of 2.75 to 3.00 percent.

Haspa's planning

Based on these assumptions, the following report focuses on Haspa's likely performance including material opportunities and risks. The forecasting horizon covers the 2026 financial year. The forward-looking statements are based for one on generally expected macroeconomic developments with a particular focus on the Hamburg Metropolitan Region, for another these statements are based on Haspa's planning for 2026, which results in specific budgets.

Higher contributions expected from the lending business and from capital market segments are expected to push net interest income in the 2026 financial year slightly above the level seen in the past financial year. Net commission income is expected to show a slight year-on-year rise in the current year. Depending on how the money and capital markets develop, contributions might be higher or lower.

Administrative expenses are likely to exceed the 2025 figure slightly in the current year, a trend that is due to expected salary and cost increases as well as further staff expansion. We expect other operating income to be considerably down on the financial year now ended.

During the course of the year, risk provisions in the lending business are expected to once again be at the level projected for 2025. Due to the amount of the specific adjustment as at 31 December 2025, however, the total negative impact of the net revaluation loss on loans is expected to be much smaller than in the past financial year. We expect the measurement of our own investment portfolio of securities to have no negative impact. Overall, we anticipate a slightly lower charge from the net revaluation loss than in the year now ended.

We expect available net income to be slightly higher than in the previous year. We expect the NPS to be somewhat higher than in 2025 and would like the corporate energy index and the innovation index to be in line with the past year.

Due not least to our broadly diversified customer business and on the basis of our tried-and-tested funding strategies and funding potential, we expect our liquidity situation to remain comfortable.

6. Note on the non-financial declaration in accordance with section 289b HGB

Haspa is obliged to publish a non-financial declaration in accordance with section 289b HGB.

Our 2025 Sustainability Report includes the statements required for a non-financial declaration concerning our business model, environmental, employee and social issues, respect for human rights and combating corruption and bribery. We are publishing the 2025 Sustainability Report together with the 2025 Annual Report in the Company Register.

Haspa holds Prime status in the ISS ESG sustainability rating.

7. Declaration in accordance with section 289f HGB

As an unlisted company subject to co-determination, Haspa is providing a declaration comprising the following statements in accordance with section 289f HGB.

In 2022, the Supervisory Board set a target for the share of women on the Supervisory Board of 25 percent to be achieved by 30 June 2027.

In 2022, the Supervisory Board set a target for the share of women in the Board of Management of 40 percent to be achieved by 30 June 2027.

A target of 30 percent each with a deadline of 30 June 2027 was set by the Board of Management for the two management levels below the Board of Management in 2022, i.e. management level 1 (divisional managers) and management level 2 (unit and branch managers including deputy managers).

Annual financial statements

The tables presented in the annual financial statements may contain rounding differences.

Balance sheet

of Hamburger Sparkasse AG for the year ended 31 December 2025

Assets in € '000		31.12.2025	31.12.2024
1.	Cash reserve		
a)	Cash on hand	255,630	283,733
b)	Balance with Deutsche Bundesbank	454,653	223,313
		710,283	507,046
2.	Public-sector debt instruments and bills of exchange eligible for refinancing with Deutsche Bundesbank		
a)	Treasury bills and non-interest bearing treasury notes and similar debt instruments issued by public-sector entities	—	—
b)	Bills of exchange	—	—
		—	—
3.	Receivables from banks		
a)	Mortgage loans	2,781	3,571
b)	Public-sector loans	—	—
c)	Other receivables	8,935,596	10,394,037
	of which:

Notes

The tables presented in the annual financial statements may contain rounding differences.

General disclosures

Hamburger Sparkasse AG (Haspa) prepared its annual financial statements as at 31 December 2025 in accordance with the requirements of the German Commercial Code (Handelsgesetzbuch – HGB) and the requirements of the German Ordinance on Accounting for Banks and Financial Services Institutions (Verordnung über die Rechnungslegung der Kreditinstitute und Finanzdienstleistungsinstitute – RechKredV), taking into account the requirements of the German Stock Corporation Act (Aktiengesetz - AktG).

The option not to break down prorated interest by residual maturity (section 11 sentence 3 RechKredV) was also applied.

Haspa's registered office is in Hamburg. The Bank has been entered in the commercial register of the Hamburg Local Court under the number HRB 80691.

Accounting policies

Lending business

Receivables from customers and banks were recognised at their nominal value or cost. Any discounts retained in connection with the disbursement of loans with a fixed borrowing rate are allocated over the fixed interest period. For loans with a variable borrowing rate, discounts are generally allocated over the entire term. For loans without an agreed interest calculation, discounts are allocated over five years.

Irrevocable debts where no payment is expected to be forthcoming from the debtor were written off.

Individual write-downs or provisions take adequate account of recognisable risks in lending. Global valuation allowances were recognised for potential risks from receivables. The requirement to reverse write-downs was observed when measuring loans.

The amount of the respective specific valuation allowances is determined taking into account the debtor's financial circumstances and the current valuation of existing collateral.

Global valuation allowances are calculated in accordance with accounting standard IDW RS BFA 7. Haspa applies the practical expedients of IDW RS BFA 7 item 23 et seq. to determine the global valuation allowances based on a 12-month expected loss. The measurement technique used is based on the methods and systems of internal risk management and takes into account the adjustments recommended by the German Savings Banks Association to determine the reporting date-related global valuation allowances. Haspa has reassessed the necessity and appropriateness of the specific adjustment amount recognised in the previous year in terms of type and scope as at the reporting date. In order to give due consideration to the very high degree of uncertainty about the future political and economic development when determining global valuation allowances, a specific adjustment amount of € 52.5 million was factored in on the basis of statistical-mathematical techniques and in line with commercial prudence. Overall, the total amount of global valuation allowances is € 22.9 million higher than at the prior-year reporting date.

Securities

All securities that are not allocated to the investment portfolio or trading portfolio are allocated to the liquidity reserve (current assets). The allocation of securities to the liquidity reserve, the trading portfolio or the investment portfolio was not changed in the financial year.

Securities in the bank's own portfolio are largely held for investment and trading, and as a liquidity reserve.

While securities allocated to the liquidity reserve are measured by applying the strict lower-of-cost-or-market principle, long-term securities are carried at cost or their net carrying amount. Investment securities are only written down if the impairment is permanent. In particular, impairment is regarded as permanent in the event of a significant deterioration in the issuer's credit standing. The requirement to reverse write-downs is taken into account in the case of both securities allocated to the liquidity reserve and investment securities.

The appropriate market value of assets that are held in special funds and for which there is no marketable price is determined by the respective fund based on due assessments using suitable measurement models and taking prevailing market conditions into account.

Trading portfolio

Financial assets acquired for trading are recognised in the trading portfolio at fair value less value at risk (VaR). Pursuant to IDW RS BFA 2, the value at risk is accounted for in the larger of the respective balance sheet items (assets or liabilities). Foreign currency financial assets and liabilities in the trading portfolio are translated at average rates.

The corresponding value at risk (VaR) is determined to satisfy regulatory requirements in respect of managing the trading book's market price risks. This VaR is used to calculate the risk discount. It is determined based on a holding period of one month, a data history of 1,250 days and a confidence level of 99.9%.

Applying the risk discount accounts for the probability of a loss of realisable profits from the measurement at market rates. Changes in the risk discounts are recognised in net trading income or expense. Gains and losses on the prices and the measurement of financial instruments are also recognised in net trading income or expense. This also applies to the addition to the fund for general banking risks pursuant to section 340e (4) HGB. This item also includes net revaluation gains/losses from the early repayment of repurchased own issues. Interest income and expense from trading are recognised in net interest income.

Shares in affiliated companies and equity investments

Shares in affiliated companies and equity investments are recognised at cost. The requirement to reverse write-downs was observed for the purpose of remeasurement. Lower values are recognised if special circumstances apply.

Intangible and tangible fixed assets

Intangible and tangible fixed assets are recognised at cost less amortisation and depreciation. Depreciation allowed under German tax rules is taken on tangible fixed assets that were acquired up to 2009.

Tangible fixed assets contain only operating and office equipment. Low-value assets costing up to € 250 excluding input tax are recognised immediately as non-staff operating expenses. Assets costing more than € 250 and up to € 1,000 excluding input tax are recognised in a pooled item, which is written down on a straight-line basis, in each case at a rate of one fifth a year.

Haspa did not use the option of capitalising internally generated software.

A practical expedient in accordance with section 240 HGB was used for measuring movable fixed assets.

Other assets

For other assets, impairments or identifiable risks were taken into account by factoring in appropriate measurement discounts.

Liabilities

Liabilities are measured at the settlement amount. Discounts taken are reported in assets under prepaid expenses whilst premium income is reported in deferred income. In deviation from the above, zero-coupon bonds are accounted for at their present value.

Provisions

The provisions shown adequately account for all recognisable risks as well as all uncertain obligations. Provisions are recognised at their settlement amount dictated by prudent business judgement. Provisions with a remaining term of more than one year are discounted at the average market interest rate published by the Deutsche Bundesbank corresponding to their remaining maturity, which in the case of provisions for pensions is for the past ten years but in the case of provisions for similar long-term obligations as well as other provisions is for the past seven years. Provisions for pensions and similar obligations are calculated according to actuarial principles using the projected unit credit method and modified Heubeck 2018 G mortality tables. The modification adjusts the probability of disability to 50 percent of the unmodified mortality tables to more appropriately present the institution-specific situation. This deviation from the previous accounting policies results in a positive effect of € 6.2 million in 2025, which would also have arisen in a similar amount in the previous year.

As at 31 December 2025, Haspa transferred a significant portion of its pension obligations to a non-insurance-type pension fund at SV SparkassenVersicherung Pensionsfonds AG through a change of the method of pension provision. Haspa retains secondary liability for the transferred obligations in accordance with section 1 (1) sentence 3 German Occupational Pensions Improvement Act (Gesetz zur Verbesserung der betrieblichen Altersversorgung – BetrAVG).

The transferred pension obligations are indirect retirement benefit obligations for which Haspa used the recognition option under section 28 (1) sentence 2 Introductory Act to the German Commercial Code (Einführungsgesetz zum Handelsgesetzbuch – EGHGB) for the first time as at the reporting date. At the time of the transfer in mid-December 2025, Haspa funded the pension fund by paying a one-time amount of € 900.0 million. By 31 December 2025, interest income of € 0.4 million had accrued on this one-time amount in the pension fund, as a result of which the pension fund assets amounted to € 900.4 million as at 31 December 2025. The pension provision was derecognised in this amount in accordance with section 28 (1) sentence 2 EGHGB. A pension provision of € 338.4 million remains for the additional amount required to settle the pension obligations concerned under German commercial law pursuant to section 340a (1) in conjunction with section 253 (1) sentence 2, (2) HGB.

The average market interest rate over the past ten years as published by Deutsche Bundesbank was taken into account for the settlement amount required under German commercial law. This is the rate that results when using the generally assumed remaining maturity of 15 years under the practical expedient set out in section 253 (2) sentence 2 HGB. As a consequence of an earlier revaluation date, a projection of the interest rate to the reporting date was made and the resulting interest rate of 2.06 percent was used.

Furthermore, wage and salary increases (including career trends) of 2.35 percent and pension increases of 2.00 percent were used. These two parameters are determined on the basis of generally accessible sources and institution-specific assumptions. The age-dependent employee turnover rate as determined by using institution-specific parameters was between 0.00 percent and 6.00 percent. In addition, the pension age used in the calculation was set at 65 years to more appropriately present the institution-specific situation. These parameters are reviewed annually.

The practical expedient set out in section 253 (2) sentence 2 HGB was also applied to pensions and similar long-term obligations as well as to other provisions calculated using actuarial opinions and a remaining maturity of 15 years was used for discounting in the aggregate. As a result of one measurement date being brought forward, a projection of the interest rates at the reporting date was performed for the interest rates used for these provisions. The resulting interest rate is 2.22 percent.

The income and expenses arising from the discounting of provisions are presented separately to achieve transparency and clarity in the notes.

Expenses for the accumulation of provisions relating to banking transactions are presented under interest expense, while interest expense for provisions not relating to banking transactions is presented under other operating expenses.

Loss-free valuation of interest rate-related transactions of the banking book (interest rate portfolio)

In compliance with IDW RS BFA 3 new version, to determine any excess of liabilities over assets resulting from business in interest-bearing financial instruments of the banking book, all administrative expenses and the cost of risk expected up until the completion of the business were deducted from the totality of interest-bearing assets and liabilities of the banking book (excluding the trading portfolio) including derivatives. Allowance was made for individual refinancing options in a present value analysis. As there is no excess of liabilities over assets, it is not necessary to recognise a provision.

Currency translation

Foreign currency amounts are translated in accordance with section 340h German Commercial Code in conjunction with section 256a German Commercial Code and in compliance with IDW RS BFA 4. Assets denominated in foreign currency that are treated as fixed assets are translated into euros at the acquisition-date foreign exchange rate. Foreign currency securities reported under current assets are measured at the spot exchange rate. Solely the expense from currency translation of securities in foreign currency with a residual maturity of more than one year is recognised.

Pursuant to section 340h German Commercial Code, other foreign currency items, as well as spot and forward transactions not yet settled that are neither held for trading nor form part of a hedge as defined in section 254 German Commercial Code, are treated as transactions that qualify for hedge accounting. The transactions are hedged based on matching amounts but not matching maturities. Hedged transactions are measured at the cash settlement or forward price. Both the cash settlement and the forward prices are based on the reference rate of the European Central Bank.

The exchange gains and losses calculated from the translation of the transactions covered in particular are presented separately in the notes under other operating income and other operating expenses, respectively.

Hedges

Haspa applies hedge accounting as defined in section 254 German Commercial Code. Hedge accounting is applied to liabilities and executory contracts considered the underlying transaction; they are hedged using derivative financial instruments.

The interest rate risks from structured bonds or registered instruments (underlying transactions) are hedged using structured interest rate swaps (hedges). The underlying transactions concern structured bearer debentures shown under "Securitised liabilities" as well as structured registered bonds, promissory note loans and savings certificates recognised in "Liabilities to customers" or "Liabilities to banks". The respective hedges are structured such that the parameters of the underlying transaction relevant to the hedged risk fully offset each other, both at the inception of the transaction and during the maturity of the underlying transaction (critical terms match).

The currency and interest rate risks of cross currency interest rate swaps with customers are hedged using exactly matched hedging transactions with banks that have good credit ratings. Both the derivative customer business and the back-to-back hedging business are subject to hedge accounting. We also enter into contracts designed to limit interest rates such as caps, floors and collars in connection with the customer lending business. These interest rate options granted to customers are hedged on the basis of the individual contract by means of matching transactions with banks that have good credit ratings.

The effectiveness of the given hedge is reviewed by a department separate from trading upon designation of the hedges as well as at the reporting date. In each case the underlying transactions are hedged effectively against the existing risks.

The accounting treatment of the hedges follows the net hedge presentation method pursuant to IDW RS HFA 35. Haspa ensures based on the methods used (critical terms match) that every hedge is effective with respect to the existing fair value and cash flow risks of the respective hedged risk. Changes in the fair value or cash

flows of both the underlying transactions and the hedges relative to the hedged risks are likely to balance out in full over the entire hedging period.

Derivatives

Interest rate swaps are used primarily to manage interest rate risks and are included in the loss-free valuation of interest rate-related transactions of the banking book (interest rate portfolio). Haspa also possesses derivative financial instruments to which hedge accounting is applied. Very few derivative financial instruments are held for trading.

In the case of options, Haspa's option writer positions are usually hedged by means of matched transactions. Option premiums received or paid on options not yet settled, as well as margin obligations from forward transactions, are recognised under financial assets and liabilities in the trading portfolio. For the rest, they are accounted for as "Other assets" or "Other liabilities".

Cash flow statement

The cash flow statement was prepared in compliance with German Accounting Standard No. 21.

Cash flow statement	2025 € million	2024 € million
Net income for the financial year	0.0	0.0
Profit transferred on the basis of profit transfer agreements	150.0	125.0
Net income/loss for the period before profit transfer	150.0	125.0

Supplementary information on the cash flow statement

The cash flow statement shows the changes in cash funds. Cash funds are composed of cash-in-hand and balances with Deutsche Bundesbank (cash).

The cash flow statement is prepared for Haspa's single-entity financial statements, which is why cash funds do not include any components attributable to proportionately consolidated entities.

There were no material non-cash investing and financing measures and transactions in the financial year.

Notes to the balance sheet (assets)

	2025 € million	2024 € million
Receivables from banks

with indefinite maturity	1,118.2	976.0
Debentures and other fixed interest securities		
Of the marketable securities included in this balance sheet item the following are:		
listed	7,799.7	6,991.7
not listed	840.5	760.7
due in the following year*	444.1	1,593.7
The carrying amount of the debentures and other fixed interest securities treated as fixed assets is	6,937.6	5,282.2
Securities not measured at the lower of cost or market	5,038.8	3,163.3
Fair value of these securities	4,864.4	2,996.7

*excluding accrued interest

Held-to-maturity bonds with a fair value below the expected repayment amount were not measured at the lower of cost or fair value. There are no indications that they will not be repaid at par.

The carrying amount of the bonds and other fixed-income securities classified as fixed assets rose by € 1,655.4 million in the financial year and amounts to € 6,937.6 million. These securities had to be written down by € 6.5 million.

Equities and other non-fixed interest securities	2025	2024
	€ million	€ million
Of the marketable securities included in this balance sheet item the following are:		
listed	0.0	0.0
not listed	0.0	0.0
The carrying amount of the equities and other non-fixed interest securities treated as fixed assets is	494.8	494.8
Securities not measured at the lower of cost or market	0.0	0.0
Fair value of these securities	0.0	0.0

The carrying amount of the equities and other non-fixed interest securities treated as fixed assets remains unchanged at € 494.8 million. It was unnecessary to write down these securities, as their market values were higher than their carrying amounts.

This balance sheet item contains shares in special funds with a carrying amount of € 2,156.9 million. The fungibility of these shares is limited. Gains on shares in special funds resulting from rate gains were reinvested, and interest and dividend income was either distributed or reinvested.

Investment funds with a share in excess of 10 percent in € million broken down by investment objective.

NAME	ISIN	Carrying amount 31.12.2025	Market value 31.12.2025	Difference	Distribution 2025	Returnable daily	Write-downs omitted
Wikinger-Fonds 1	DE000DK0NLE4	1,662.1	1,937.0	274.9	20.0	Yes	No
Equity, bond and property investment fund: Equity, government bond and property investment fund shares							
Wikinger-Fonds 2	DE000DK0LNF1	494.8	513.6	18.8	15.9	Yes	No
Bond fund: Pfandbriefe, covered bonds and government-guaranteed bonds							

Trading portfolio	2025	2024
	€ million	€ million
The trading portfolio comprises:		
Derivative financial instruments	0.6	4.0
Receivables	0.0	0.0
Debentures and other fixed interest securities	27.2	81.6
Equities and other non-fixed interest securities	0.1	0.0
Other assets	0.0	0.0
Subtotal	27.9	85.6
Risk discount	0.0	- 1.0
	27.9	84.6

The nominal value of the derivative financial instruments is € 8.2 million for currency options.

In the financial year, two long-dated interest rate swaps reported as assets with a carrying amount of € 3.1 million and their economic hedges reported as liabilities with a carrying amount of € 2.9 million were reclassified out of the trading portfolio and into the investment portfolio, as Haspa does not believe that they will be tradable over the long term. The reclassification did not have a significant effect on the income statement.

The difference between the higher of the settlement amount and the issue price of liabilities or debentures	4.9	6.4
Other deferred income	19.8	4.3
	28.9	16.3

Provisions

The difference between the carrying amount of the pension provisions using the average market interest rate for the past ten years and the carrying amount using the average market interest rate for the past seven years calculated in accordance with section 253 (6) sentence 1 HGB was € -38.0 million as at 31 December 2025 (previous year: € -17.6 million).

Subordinated liabilities

Interest of € 8.4 million was paid on € 151.6 million in subordinated liabilities during the reporting year. The subordinated liabilities consist of bullet bearer debentures and registered bonds. The subordinated liabilities fall due between 2031 and 2035. An obligation to repay them early cannot arise. The nominal interest rate is between 4.85 percent and 6.5 percent p.a. According to the terms and conditions of these debentures and bonds and the rules of the Single Resolution Mechanism (SRM), the relevant resolution authorities are entitled to convert claims to capital and interest into shares or other Common Equity Tier 1 capital instruments. The issues made represent supplementary capital in accordance with the Articles 62 to 71 of the Capital Requirements Regulation (CRR).

Subordinated liabilities that exceed 10 percent of the total portfolio

Securitisation	Liability in € million	Currency	Interest rate p.a.	Maturity	Redemption rate
Bearer debenture	15.4	€	6.330%	13.07.2033	100%
Registered bond	18.2	€	5.650%	11.04.2034	100%

Fund for general banking risks

This position includes an extraordinary item of € 1,050 million in accordance with section 340g (1) HGB. Furthermore, an extraordinary item of € 3 million in accordance with section 340e (4) HGB is shown.

Equity

The equity is € 1 billion and is divided into 1,000,000 no par shares. HASPA Finanzholding holds all of these shares.

Statement of changes in equity

The statement of changes in equity shows the development of equity:

in € million	Subscribed capital	Capital reserves	Revenue reserves	Net retained profits	Reported equity
Balance on 01.01.2025	1,000.0	1,815.0	217.0	0.0	3,032.0
Allocation		125.0			
Net income/loss for the period before profit transfer				150.0	
Profit to be transferred				-150.0	
Balance on 31.12.2025	1,000.0	1,940.0	217.0	0.0	3,157.0

The transfer to the capital reserve resulted from a capital injection made by HASPA Finanzholding.

Contingent liabilities and other obligations

Contingent liabilities

Guarantees, warranties and indemnity agreements assumed for borrowers are recorded in this item. On the basis of the regular assessments of customers' credit quality as part of our credit risk management processes, we assume that the amounts disclosed here will not result in an economic burden. Appropriate risk provisions have been recognised for significant default risks.

Irrevocable credit commitments

The irrevocable credit commitments largely comprise loans that have been not yet been fully disbursed. They are subject to the regular credit monitoring processes that apply to all credit commitments. Appropriate risk provisions have been recognised for significant default risks.

Notes to the income statement

Interest income

In the financial year, negative interest of € 31.0 thousand is shown for lending products.

Interest expense

Interest expense includes negative interest for deposit products of € 0.2 million. This item also includes a total of € 54.0 thousand (previous year: € 41.6 thousand) due to the unwinding of discounts on provisions related to the banking business.

Income from profit pooling, profit transfer, or partial profit transfer agreements

This item totalling € 1.3 million does not include any tax allocations.

Current income

There were distribution from Haspa's special funds amounting to € 35.9 million in the reporting period.

Commission income

A portion of 31.2 percent of total commission income is attributable to brokerage and management services for third parties. This item includes € 1.1 million in prior-period income.

Other operating income

This item contains income of € 34.0 million in total from the adjustments to parameters and the change in accounting policies for provisions for pensions and similar long-term obligations. This item also includes income of € 6.9 million from currency translation (previous year: € 6.7 million), income of € 5.4 million from the reversal of provisions (previous year: € 7.1 million) and an amount of € 14.2 million resulting from discounting long-term provisions.

Other operating expenses

Other operating expenses include a total of € 0.2 million (previous year: € 4.5 million) due to the unwinding of discounts on long-term provisions. Also included are expenses from the provision of collateral for interest rate hedges in central clearing in the amount of € 6.6 million (previous year: € 16.6 million).

Taxes on income

This item totalling € 162.2 million includes € 160.7 million in tax allocations. The tax allocations are comprised of expenses from current tax allocations of € 160.4 million, prior-period reimbursements of tax allocations of € 0.1 million and prior-period expenses from tax allocations of € 0.4 million.

Other disclosures

Disclosures in accordance with section 160 (1) no. 8 AktG

The following announcement was published by Haspa in the Electronic Federal Gazette on 17 July 2003:

"HASPA Finanzholding, Hamburg, has advised us that they hold a controlling interest (section 20 (4) AktG in conjunction with section 16 (1) AktG) in our company."

Disclosures in accordance with section 285 No. 21 German Commercial Code

No transactions were carried out at off-market terms.

Board of Management and Supervisory Board

In the 2025 financial year, the members of the Board of Management received total benefits of € 3.4 million. Loans and guarantees granted to members of the Board of Management amounted to € 2.8 million. The total benefits of former members of the Board of Management amounted to € 0.2 million.

A total of € 3.3 million was set aside for pension commitments to former members of the Board of Management and their surviving dependants.

The total benefits of the members of the Supervisory Board in financial year 2025 amounted to € 0.9 million. Loans and guarantees granted to members of the Supervisory Board amounted to € 2.1 million.

Expenses for the auditor

The total fee for the auditor for the 2025 financial year amounted to € 1.2 million, of which € 1.2 million concerned the audit of the annual financial statements and € 29 thousand other assurance services. Other operating income includes € 93 thousand from the reversal of the provision for audit services from the previous year.

The audit services provided mainly relate to statutory audit services, which include the audit of the annual financial statements, the audit of the investment services and custodian business, and the audit of arrangements to prevent money laundering and the financing of terrorism and other criminal acts.

Amounts not available for distribution in accordance with section 268 (8) German Commercial Code

There were no amounts not available for distribution in accordance with section 268 (8) German Commercial Code in the 2025 financial year.

Other financial obligations

There are obligations arising from letting, rental and lease agreements in effect for the next financial years.

Financial year	€ million	of which affiliated and associated companies € million
2026	55.7	4.6
2027	56.8	4.8
2028	57.7	4.8
	170.2	14.1

As a unitholder in the Wiking-Fonds 1 special fund, Haspa has taken on the obligation of making capital contributions to the special fund for the target funds' outstanding capital calls if the special fund's freely available funds are not sufficient. The outstanding capital calls as of the reporting date amounting to € 12.5 million are fully covered by freely available funds of the special fund.

Haspa is affiliated with the nationwide guarantee scheme of the German Savings Bank's Organisation. There is a cross-guarantee system between participants in this protection scheme, which means that participants have the German Savings Banks Finance Group's entire volume of guarantees at their disposal. According to section 48 (2) No. 5 of the German Deposit Guarantee Act (EinSiG), Haspa is obligated to make guaranteed annual and special contributions to this guarantee scheme as well as the one-off payment. In the financial year, Haspa made use of the option to make part of its annual contributions in the form of an irrevocable payment obligation. As of 31 December 2025, corresponding irrevocable payment obligations associated with the German Savings Banks Finance Group guarantee scheme totalled € 25.1 million (previous year: € 25.6 million). Haspa has deposited securities with a carrying amount of € 40.0 million that is equal to the amount of the irrevocable payment obligations.

At a European level, Haspa has been obligated since 2015 to make annual contributions to the restructuring fund ("European bank levy"). Irrevocable payment obligations associated with the bank levy in accordance with the EU Bank Recovery and Resolution Directive (BRRD) and the Single Resolution Fund (SRF) amounted to € 23.7 million as of 31 December 2025 (previous year: € 23.7 million). Haspa has deposited cash collateral equal to the amount of the irrevocable payment obligations that are recognised under "Other assets".

For the benefit obligations transferred to the non-insurance-type pension fund, Haspa has an obligation to provide additional funding if the available assets are lower than the minimum pension benefit reserve for retirees (the present value of all future payment obligations for retirees as at the assessment date). As at the reporting date, there was no obligation to provide additional funding, as the assets by far exceeded the minimum pension benefit reserve.

There were no off-balance sheet transactions pursuant to section 285 no. 3 German Commercial Code at the reporting date.

Report on post-balance sheet date events

No events of special significance took place after the reporting date.

Foreign currency

Total assets and liabilities denominated in foreign currency were translated into € 855.3 million and € 621.7 million respectively.

Forward transactions / Derivative financial transactions

The following tables show the volume of transactions in effect at the end of 2025.

Derivatives are always measured by reference to their current market price. The prices on the last trading day in 2025 were used for derivatives traded on a stock exchange. If no current market price is immediately available, the measurement is based on standard financial valuation methods. In the case of interest swaps for instance, the present value is determined based on the current yield curve. In currency futures, the forward rate is used. The fair values of currency options are determined based on the current spot exchange rate, yield curves as well as implied volatilities (Garman-Kohlhagen model). The fair values of interest rate options are determined using yield curves and implicit levels of volatility (Black-Scholes model, Black-76 model or Hull-White model).

Haspa issues structured securities that are matched by swaps combined into micro hedges such that the included interest rate risks are hedged in full.

The majority of Haspa's interest-related transactions mentioned below were carried out to limit interest rate risks; they were included in the loss-free valuation of interest rate-related transactions of the banking book (interest rate portfolio). Haspa's maturities transformation is managed as part of its asset and liabilities

management by means of the interest rate swaps. Interest rate derivatives admitted to a stock exchange for trading concern trades for customers.

A large portion of the currency-related transactions concerns transactions with customers that are always hedged through foreign exchange contracts and, to a lesser extent, own portfolio trading and own securities hedging. The currency-related derivative transactions constitute an almost closed position in conjunction with Haspa's foreign currency holdings.

Transactions involving other price risks solely comprise trades for customers.

The amount, timing and probability of occurrence of future cash flows from the derivative financial instruments held for trading are mainly influenced by the interest rate environment and developments in credit spreads.

Hedges

Both liabilities with a carrying amount of € 3,491.7 million and executory contracts with a nominal value of € 51.3 million were classified as underlying transactions and subject to hedge accounting pursuant to section 254 sentence 1 German Commercial Code. These are so-called micro hedges. All underlying transactions are hedged against interest rate and currency risks using derivative financial instruments.

At 31 December 2025, transactions with a negative fair value of € 621.9 million were in place to hedge interest rate risks and transactions with a negative fair value of € 0.5 million to hedge currency risks.

– Risk net present value ¹	192.4	1,965.3
Statutory excess cover²		
– Nominal value	31.8	1.3
– Present value	21.6	0.9
Contractually agreed excess cover³		
– Nominal value	0.0	0.0
– Present value	0.0	0.0
Voluntary excess cover⁴		
– Nominal value	1,093.7	391.2
– Present value	1,064.6	410.0

¹ The dynamic approach according to section 5 (1) no. 2 German Pfandbrief Net Present Value Directive was used for the calculation of the risk net present value.

² Nominal value: Sum of the nominal value of the excess cover pursuant to section 4 (2) PfandBG and the nominal value of the excess cover pursuant to section 4 (1) PfandBG ("barwertige sichernde Überdeckung")

Present value: present value of the statutory excess cover in accordance with section 4 (1) PfandBG ("barwertige sichernde Überdeckung")

³ Contractually agreed excess cover

⁴ Residual, depending on the statutory and the contractually agreed excess cover; the present value includes the net present value of the excess cover pursuant to section 4 (2) PfandBG

Present values do not have to be presented by foreign currency because the cover assets are based exclusively on euro-denominated transactions.

Mortgage Pfandbrief securities

	2025 € million	2024 € million
Section 28 (1) no. 6 PfandBG		
Absolute amount of the largest non-zero negative total in the next 180 days as defined by section 4 (1a) sentence 3 PfandBG for the Pfandbrief securities (liquidity requirement)	94.8	67.8
Day on which the largest negative sum results (1–180)	145	25

Mortgage Pfandbrief securities

2025

Prerequisites for the extension of maturity of the Pfandbriefe in accordance with section 30 (2a) PfandBG

The extension of the maturity is necessary in order to avoid the imminent insolvency of the Pfandbrief bank with limited business activity, provided that the Pfandbrief bank with limited business activity is not overindebted and there is reason to believe that the Pfandbrief bank with limited business activity will be able to meet its liabilities then due after the expiry of the maximum possible extension date, taking into account further possibilities for extension. See also, in addition, section 30 (2b) PfandBG.

Powers of the cover pool administrator in the event of the extension of maturity of the Pfandbriefe in accordance with section 30 (2a) PfandBG

The cover pool administrator may extend the maturity dates of the principal payments if the relevant requirements pursuant to section 30 (2b) PfandBG are met. The administrator shall determine the period of the extension of the maturity, which may not exceed a period of 12 months, in accordance with necessity. The cover pool administrator may extend the maturity dates of the principal and interest payments falling due within one month after the appointment of the cover pool administrator to the end of that monthly period. If the cover pool administrator decides in favour of such an extension of the maturity, the existence of the prerequisites pursuant to section 30 (2b) PfandBG shall be irrefutably presumed. Such an extension shall be taken into account within the maximum extension period of 12 months. The cover pool administrator may only exercise his authority uniformly for all Pfandbriefe of an issue. In this connection, the maturities may be extended in full or on a pro rata basis. The cover pool administrator must extend the maturity for a Pfandbrief issue in such a way that the original order of servicing of the Pfandbriefe which could be overtaken by the postponement is not changed (prohibition of overtaking). This may result in the maturities of later maturing issues also having to be extended in order to comply with the prohibition on overtaking. See also, in addition, section 30 (2a) and (2b) PfandBG.

Haspa is included in the consolidated financial statements of HASPA Finanzholding, Hamburg, Germany, as the latter's wholly-owned subsidiary. The consolidated financial statements of HASPA Finanzholding are published in the Company Register. Haspa has entered into a control and profit transfer agreement with HASPA Finanzholding pursuant to section 291 (1) AktG. Whilst Haspa in turn has equity interests in subsidiaries as well, pursuant to section 296 HGB it may dispense with preparation of (partial) consolidated financial statements.

SV SparkassenVersicherung Pensionsfonds AG generally qualifies as a special purpose entity pursuant to section 340i (2) sentence 1 in conjunction with section 290 (2) no. 4 HGB. If the special purpose entity were to be included in any consolidated financial statements of Haspa, the plan assets under commercial law would be measured at fair value and the pension obligations, taking into account the option under section 340i (2) sentence 1 in conjunction with section 308 (2) sentence 2 HGB, would be measured at the business sector-specific carrying amounts for the non-insurance-type pension fund (section 13 Regulation on Pension Fund Accounting (Verordnung über die Rechnungslegung von Pensionsfonds –RechPensV) in conjunction with section 24 of the Regulation on the Supervision of Pension Funds and Pure Defined Contribution Schemes in Occupational Retirement Provision (Verordnung betreffend die Aufsicht über Pensionsfonds und über die Durchführung reiner Beitragszusagen in der betrieblichen Altersversorgung – PFAV). As at the reporting date, the cover assets consist exclusively of bank balances. Interest income of € 0.4 million accrued as at 31 December 2025.

Presentation of the gross values of the special purpose entity

Offsetting of cover assets	Balance sheet item	Cost € million	Fair value € million
Cash	3. Receivables from banks	900.4	900.4
Offsetting of liabilities	Balance sheet item	Settlement amount € million	
Liability for remaining coverage	7a.) Provisions for pensions and similar obligations		900.4
Net amount from offsetting			0.0
Offsetting of expenses and income	Income statement item	€ million	
Offsetting of expenses	11. Other operating expenses		0.4
Offsetting of income	8. Other operating income		0.4
Net amount from offsetting			0.0

Haspa's subsidiaries are individually and jointly subject to section 296 (2) HGB. Relative to Haspa's separate financial statements, these subsidiaries, individually and jointly, due to their single-digit ratios would have an insignificant effect on Haspa's net assets, financial position and results of operations shown in consolidated financial statements of Haspa if Haspa prepared (sub)group accounts.

Additional information

Independent auditor's report

To Hamburger Sparkasse AG, Hamburg

Report on the audit of the annual financial statements and of the management report

Audit opinions

We audited the annual financial statements of Hamburger Sparkasse AG, comprising the balance sheet as at 31 December 2025, the income statement, the cash flow statement and the statement of changes in equity for the financial year from 1 January 2025 to 31 December 2025 as well as the notes including the presentation of accounting policies. We also audited the management report of Hamburger Sparkasse AG, Hamburg, for the financial year from 1 January 2025 to 31 December 2025. In accordance with German legal requirements, we did not audit the content of those parts of the management report specified in the section entitled "Other information" and further sections of the management report.

In our opinion, on the basis of the knowledge obtained in the audit

- the accompanying annual financial statements comply, in all material respects, with the provisions of German commercial law as applicable to credit institutions and in compliance with the German proper accounting principles give a true and fair view of the assets, liabilities and financial position of the Sparkasse as at 31 December 2025, and of its results of operations for the financial year from 1 January 2025 to 31 December 2025, and
- the accompanying management report as a whole provides a suitable view of the Sparkasse's position. In all material respects, this management report is consistent with the annual financial statements, complies with German legal requirements and appropriately presents the opportunities and risks of future development. Our audit opinion on the management report does not extend to the content of those parts of the management report specified in the section entitled "Other information".

Pursuant to section 322 (3) sentence 1 of the German Commercial Code (HGB), we declare that our audit has not led to any reservations relating to the legal compliance of the annual financial statements and of the management report.

Basis for the audit opinions

We conducted our audit of the annual financial statements and of the management report in accordance with section 317 HGB and the EU Audit Regulation (No. 537/2014, referred to subsequently as "EU Audit Regulation") and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer [Institute of Public Auditors in Germany] (IDW). Our responsibilities under those requirements and principles are further described in the "Auditor's Responsibilities for the Audit of the Annual Financial Statements and of the Management Report" section of our auditor's report. We are independent of the Sparkasse in accordance with the requirements of European law and German commercial and professional law, and we have fulfilled our other German professional responsibilities in accordance with these requirements. In addition, in accordance with Article 10 (2) point (f) of the EU Audit Regulation in conjunction with section 340k (3) sentence 2 HGB, we declare that all persons employed by us who can influence the result of the audit have not provided non-audit services prohibited under Article 5 (1) of the EU Audit Regulation. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions on the annual financial statements and on the management report.

Key audit matters in the audit of the annual financial statements

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the annual financial statements for the financial year from 1 January 2025 to 31 December 2025. These matters were addressed in the context of our audit of the annual financial statements as a whole, and in forming our audit opinion thereon; we do not provide a separate audit opinion on these matters.

Our presentation of these key audit matters has been structured as follows:

- a) Matter and issue
- b) Audit approach and findings
- c) Reference to further information

1. Measurement of receivables from customers, particularly in the context of the current economic environment

a) Loan assets in the amount of € 35,869.7 million have been reported in the Sparkasse's annual financial statements as of 31 December 2025 under the balance-sheet item "Receivables from customers". For this loan portfolio, risk provisions have been recognised in the balance sheet as of 31 December 2025 which consist of specific and global valuation allowances and provisions for credit risks. The expenses for risk provisions in the lending business recognised in the income statement for financial year 2025 have increased year-on-year.

The measurement of risk provisions for customer lending business is determined, in particular, by the Board of Management's assessment regarding future credit losses, the structure and quality of the loan portfolio as well as overall economic factors. The value of specific valuation allowances on customer receivables corresponds to the difference between the loan amount outstanding and the lower fair value as of the reporting date. Collateral is taken into consideration. Global valuation allowances were recognised in accordance with accounting standard IDW RS BFA 7 for foreseeable counterparty risks in the lending business that have not yet been specified for individual borrowers in the amount of the expected loss over a period of 12 months based on the figure calculated and also used for internal risk management purposes. The Sparkasse has reassessed the necessity and appropriateness of the specific adjustment amount recognised in the previous year in terms of type and scope as at the reporting date. In order to give due consideration to the very high degree of uncertainty about the future political and economic development, a specific adjustment amount of € 52.5 million was also recognised on the basis of statistical-mathematical techniques when determining global valuation allowances.

Valuation allowances on customer lending business have a highly significant impact on the Sparkasse's net assets, financial position and results of operations, while the Sparkasse's Board of Management has significant discretion over these valuation allowances. In addition, the measurement parameters applied which are subject to a high level of uncertainty play a considerable role in determining whether it is necessary to establish valuation allowances and, if so, their amount. In this context, this matter was particularly significant in the context of our audit.

b) Within the framework of our audit, we initially assessed the appropriateness of the controls implemented within the Sparkasse's relevant internal control system and tested the functionality of these controls on a spot check basis. In doing so, we took into consideration the bank's business organisation, its IT systems and relevant measurement models. We also assessed the measurement of customer receivables, including the appropriateness of estimated values, on the basis of spot checks of credit commitments. We therefore evaluated the Sparkasse's documentation concerning its financial condition as well as the recoverability of collateral. In addition, we have evaluated the calculation methods applied by the Sparkasse as well as the underlying assumptions and parameters by way of assessment of the specific and global valuation allowances recognised. We have assessed the appropriateness of the inclusion of further specific risk factors in relation to the current economic uncertainty. On the basis of our audit activities, we were able to confirm the appropriateness of the assumptions made by the Sparkasse's Board of Management in its review of the asset quality of its loan portfolio as well as the appropriateness and effectiveness of the processes implemented by the Sparkasse.

c) Further information is included in the notes to the annual financial statements of the Sparkasse in the section on "accounting policies" and in the management report section "2.3.2. Results of operations".

2. Accounting treatment of the transfer of direct pension obligations of the Sparkasse to a non-insurance-type pension fund

a) The Board of Management of the Sparkasse decided to transfer certain benefit obligations to a non-insurance-type pension fund in return for payment of a one-time amount of € 900.0 million. In our view, this matter was particularly significant, as the assessment of whether the requirements under German commercial law for the derecognition of the pension obligations are met can be regarded as very complex.

b) In the course of our audit, we considered the opinion obtained by the Sparkasse on the accounting treatment of the matter under German commercial law and its conformity with the contractual framework as well as an actuary's actuarial report on the calculations and assessments of the pension obligations as at 31 December 2025. Among other things, we reviewed whether:

- the Sparkasse's assessment based on commercial law complies with statutory provisions and generally accepted accounting principles,
- the requirements for complete derecognition of the pension provision for the obligations transferred to the pension fund are met as at 31 December 2025 and
- the notes to the annual financial statements for financial year 2025 are complete and the note pursuant to section 28 (2) EGHGB is correct.

Through our audit procedures, we were able to satisfy ourselves that the pension provision was accounted for appropriately, taking into account the outsourcing of pension obligations to a non-insurance-type pension fund.

c) Further information is included in the notes to the annual financial statements of the Sparkasse in the section on "accounting policies" and in the management report section "2.2. Course of business".

Other information

The Board of Management and the Supervisory Board are responsible for the other information. The other information comprises:

- the separate non-financial report in accordance with section 289b HGB, which is referenced in section 6 of the management report, "Note on the non-financial declaration in accordance with section 289b HGB",
- the corporate governance declaration in accordance with section 289f HGB contained in section 7 of the management report, "Declaration in accordance with section 289f HGB",
- the report of the Supervisory Board, and
- all other parts of the annual report of Hamburger Sparkasse AG for the year ended 31 December 2025 that are not relevant for the audit, but not the annual financial statements, not the audited content of the management report and not our auditor's report thereon.

The Supervisory Board is responsible for the report of the Supervisory Board. The Board of Management is responsible for the other information.

Our audit opinions on the annual financial statements and on the management report do not extend to the other information, and consequently we do not express an audit opinion or any other form of assurance conclusion thereon.

In connection with our audit, our responsibility is to read the other information mentioned above and, in so doing, to consider whether the other information

- is materially inconsistent with the annual financial statements, with the audited content of the management report or our knowledge obtained in the audit, or
- otherwise appears to be materially misstated.

Responsibility of the Board of Management and the Supervisory Board for the annual financial statements and the management report

The Board of Management is responsible for the preparation of the annual financial statements, which in all material respects comply with the provisions of German commercial law as applicable to banks, and it is responsible that the annual financial statements in compliance with the German proper accounting principles give a true and fair view of the assets, liabilities, financial position and results of operations of the Sparkasse. In addition, the Board of Management is responsible for such internal control as they have determined necessary in accordance with the German principles of proper accounting to enable the preparation of annual financial

statements that are free from material misstatement, whether due to fraud or error.

In preparing the annual financial statements, the Board of Management is responsible for assessing the Sparkasse's ability to continue as a going concern. Furthermore, it has the responsibility to disclose matters related to going concern, as applicable. In addition, it is responsible for financial reporting based on the going concern basis of accounting unless there is an intention to liquidate the company or to cease operations, or there is no realistic alternative but to do so.

In addition, the Board of Management is responsible for the preparation of the management report, which as a whole provides a suitable view of the Sparkasse's situation, is consistent with the annual financial statements in all material respects, complies with the German legal regulations and suitably presents the opportunities and risks of future development. Furthermore, the Board of Management is responsible for such arrangements and measures (systems) which it has deemed necessary in order to enable the preparation of a management report in accordance with the German legal regulations to be applied and to furnish sufficient and appropriate evidence for the statements in the management report.

The Supervisory Board is responsible for overseeing the Sparkasse's financial reporting process for the preparation of the annual financial statements and of the management report.

Auditor's Responsibilities for the audit of the annual financial statements and of the management report

Our objectives are to obtain reasonable assurance about whether the annual financial statements as a whole are free from material misstatement, whether due to fraud or error, and whether the management report as a whole provides an appropriate view of the Sparkasse's position and, in all material respects, is consistent with the annual financial statements and the knowledge obtained in the audit, complies with the German legal requirements and appropriately presents the opportunities and risks of future development, as well as to issue an auditor's report that includes our audit opinions on the annual financial statements and on the management report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with section 317 HGB and the EU Audit Regulation and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer (IDW) will always detect a material misstatement. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual financial statements and this management report.

As part of an audit, we exercise professional judgement and maintain professional scepticism. We also

- identify and assess the risks of material misstatement of the annual financial statements and of the management report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our audit opinions. The risk of not detecting a material misstatement resulting from fraud is higher than the risk of not detecting a material misstatement resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.
- obtain an understanding of internal controls relevant to the audit of the annual financial statements and of arrangements and measures (systems) relevant to the audit of the management report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an audit opinion on the effectiveness of Sparkasse's internal controls or these arrangements and measures.
- evaluate the appropriateness of accounting policies used by the Board of Management and the reasonableness of estimates made by the Board of Management and related disclosures.
- form conclusions on the appropriateness of the Board of Management use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Sparkasse's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in the auditors' report to the related disclosures in the annual financial statements and in the management report or, if such disclosures are inadequate, to modify our respective audit opinions. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may

cause the Sparkasse to cease to be able to continue as a going concern.

- evaluate the overall presentation, structure and content of the annual financial statements, including the disclosures, and whether the annual financial statements present the underlying transactions and events in a manner that the annual financial statements in compliance with the German proper accounting principles give a true and fair view of the assets, liabilities, financial position and results of operations of the company.
- evaluate the consistency of the management report with the annual financial statements, its legal consistency, and the view of the Sparkasse's position it provides.
- perform audit procedures on the forward-looking information presented by the Board of Management in the management report. On the basis of sufficient appropriate audit evidence we evaluate, in particular, the significant assumptions used by the Board of Management as a basis for the forward-looking information, and evaluate the proper derivation of the forward-looking information from these assumptions. We do not express a separate audit opinion on the forward-looking information and on the underlying assumptions. There is a significant, unavoidable risk that future events will differ materially from the forward-looking information.

We discuss with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal controls that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with the relevant independence requirements and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, the actions taken or safeguards applied to eliminate independence threats.

From the matters discussed with those charged with governance, we determine those matters that were of most significance in the audit of the annual financial statements of the current reporting period and are therefore the key audit matters. We describe these matters in the auditor's report, unless law or regulation precludes public disclosure of the matter.

Other legal and regulatory requirements

Assurance report in accordance with section 317 Abs. 3a HGB on the electronic reproduction of the annual financial statements and the management report prepared for publication purposes

Assurance conclusion

We have performed an assurance engagement in accordance with section 317 (3a) HGB to obtain reasonable assurance about whether the reproduction of the annual financial statements and the management report (hereinafter also referred to as "ESEF documents") contained in the electronic file Haspa_AG_ESEF-2025-12-31.xhtml and prepared for publication purposes complies in all material respects with the requirements of section 328 (1) HGB for the electronic reporting format ("ESEF format"). In accordance with German legal requirements, this assurance engagement only extends to the conversion of the information contained in the annual financial statements and the management report into the ESEF format and therefore relates neither to the information contained within this reproduction nor to any other information contained in the above-mentioned electronic file.

In our opinion, the reproduction of the annual financial statements and the management report contained in the above-mentioned electronic file and prepared for publication purposes complies in all material respects with the requirements of section 328 (1) HGB for the electronic reporting format. We do not express any opinion on the information contained in this reproduction nor on any other information contained in the above-mentioned file beyond this reasonable assurance conclusion and our audit opinion on the accompanying annual financial statements and the accompanying management report for the financial year from 1 January 2025 to 31 December 2025 contained in the "Report on the Audit of the Annual Financial Statements and on the Management Report" above.

Basis for the reasonable assurance conclusion

We conducted our assurance engagement on the reproduction of the annual financial statements and the management report contained in the above-mentioned electronic file in accordance with section 317 (3a) HGB and the IDW Assurance Standard: Assurance in Accordance with section 317 (3a) HGB on the Electronic Reproduction of Financial Statements and Management Reports Prepared for Publication Purposes (IDW AsS 410 (06.2022)). Accordingly, our responsibilities are further described below in the “Auditor’s Responsibilities for the Assurance Engagement on the ESEF Documents” section. Our audit department has applied the IDW Standard on Quality Management: Requirements for Quality Management in the Audit Firm (IDW QMS 1 (09.2022)).

Responsibility of the Board of Management and the Supervisory Board for the ESEF documents

The Sparkasse’s Board of Management is responsible for the preparation of the ESEF documents including the electronic reproduction of the annual financial statements and the management report in accordance with section 328 (1) sentence 4 no. 1 HGB.

In addition, the Sparkasse’s Board of Management is responsible for such internal control as they have considered necessary to enable the preparation of ESEF documents that are free from material non-compliance with the requirements of section 328 (1) HGB for the electronic reporting format, whether due to fraud or error.

The Supervisory Board is responsible for overseeing the process of preparing the ESEF documents as part of the financial reporting process.

Auditor’s responsibilities for the assurance engagement on the ESEF documents

Our objective is to obtain reasonable assurance about whether the ESEF documents are free from material non-compliance with the requirements of section 328 (1) HGB, whether due to fraud or error. As part of an audit, we exercise professional judgement and maintain professional scepticism. We also

- identify and assess the risks of material non-compliance with the requirements of section 328 (1) HGB, whether due to fraud or error, design and perform assurance procedures responsive to those risks, and obtain assurance evidence that is sufficient and appropriate to provide a basis for our assurance conclusion.
- obtain an understanding of internal control relevant to the assurance engagement on the ESEF documents in order to design assurance procedures that are appropriate in the circumstances, but not for the purpose of expressing an assurance conclusion on the effectiveness of these controls.
- Evaluate the technical validity of the ESEF documents, i.e., whether the electronic file containing the ESEF documents meets the requirements of Commission Delegated Regulation (EU) 2019/815 as applicable on the reporting date on the technical specification for this electronic file.
- evaluate whether the ESEF documents enable an XHTML reproduction with content equivalent to the audited annual financial statements and the audited management report.

Further information pursuant to Article 10 of the EU Audit Regulation

In accordance with section 340k (3) HGB in conjunction with the Articles of Association of the Sparkasse and the HSGV, as well as the audit regulation for the HSGV’S audit office, we are the Sparkasse’s statutory auditor. We were elected as auditor of the financial statements by the General Meeting on 10 April 2025. We were engaged by the Supervisory Board on 4 September 2025.

We declare that the audit opinions expressed in this auditors’ report are consistent with the additional report to the audit committee pursuant to Article 11 of the EU Audit Regulation (long-form audit report).

The services rendered by us in addition to the audit of the financial statements are listed in the notes to the financial statements of Sparkasse under Other information, Expenses for the auditor.

Other matter – use of the auditor’s report

Our auditor’s report must always be read together with the audited annual financial statements and the audited management report as well as the assured ESEF documents. The annual financial statements and the management report converted to the ESEF format – including the versions to be uploaded to the Company Register – are merely electronic renderings of the audited annual financial statements and the audited management report and do not take their place. In particular, the ESEF report and our assurance opinion contained therein are to be used solely together with the assured ESEF documents made available in electronic form.

Responsible auditor

The German Public Auditor responsible for the engagement is Mr Dirk Bolte.

Hamburg, 17 March 2026

Auditing Division of the
HANSEATISCHER SPARKASSEN- UND GIROVERBAND
(HANSEATIC SAVINGS BANKS ASSOCIATION)

Dirk Bolte
Wirtschaftsprüfer (German Public Auditor)

Report of the Supervisory Board

During the reporting year, the Supervisory Board and the Board of Management regularly, without delay and comprehensively discussed all fundamental matters related to the strategic alignment of Hamburger Sparkasse AG, its corporate policies, its company planning, the development of its operating business, its financial condition, its exposure to risk and the business and risk strategy, and the Supervisory Board made all decisions that were incumbent on it. All issues key to the company were discussed in depth with the Board of Management in four plenary sessions. In addition, the Supervisory Board in a further meeting discussed a candidate for division management and convened for a joint meeting with the Supervisory Board of HASPA Finanzholding, at which it discussed the business scenarios underlying the planning. Matters of major importance as well as topics specified in particular in the German Banking Act were discussed and fleshed out ahead of time at the meetings of the committees established from among the members of the Supervisory Board. The Supervisory Board met in person, with individual members sometimes joining meetings via video link.

In addition to the ongoing discussions on the financial and risk situation, other issues of importance for the Supervisory Board were the appointment of a new member of the Board of Management effective 1 June 2026 to succeed a retiring Board of Management member, the internal ratings-based approach (IRBA) for calculating capital requirements, the transfer of pension obligations to a pension fund, the Haspa Social Bond as well as on-site inspections and the European Central Bank's SREP decision.

Following a lengthy debate and based on a list of different criteria, the Supervisory Board then assessed its structure, size, composition and performance as well as the knowledge, skills and experience of both Supervisory Board members and the Supervisory Board as a whole and determined these to be adequate and in line with regulatory requirements. The Supervisory Board also devoted attention to the structure, performance and suitability of the Board of Management and its members, which it judged to be appropriate and in line with the requirements applicable to Hamburger Sparkasse AG, and decided on how to measure and set the variable remuneration awarded to the members of the Board of Management.

The Supervisory Board was involved in all material decisions of Hamburger Sparkasse AG requiring its consent by law or the company's articles of association. The Chairman of the Supervisory Board and the Spokesman of the Board of Management also regularly engaged in discussions at which the latter informed the former of current operational matters and addressed strategic considerations ahead of time. The Supervisory Board satisfied itself of the Board of Management's due and proper conduct of business and made all decisions that are incumbent upon it by its authority – especially under the requirements of applicable laws and the articles of association. It received regular reports on the work of the committees. The annual training event focused on the importance and potential applications of artificial intelligence in banks, current regulatory developments in risk reporting and the new EU Anti-Money Laundering Authority (AMLA).

The auditing division of the Hanseatischer Sparkassen- und Giroverband (Hanseatic Savings Banks Association), which the General Meeting had elected to serve as the auditors, audited the bank's annual financial statements as at 31 December 2025 – comprising the balance sheet, income statement, notes as well as the cash flow statement and the statement of changes in equity – including the bookkeeping system as well as the management report and issued an unqualified auditors' report.

The auditors' report was submitted to the members of the Audit Committee tasked with conducting a preliminary review and presented to further members of the Supervisory Board for inspection. The auditors attended the financials meetings of the Audit Committee and the Supervisory Board and reported on the material findings of their audit. The Supervisory Board discussed the auditors' report in detail and duly noted its findings. The Supervisory Board's own review fully concurs with the results of the audit by the auditing division of the Hanseatic Savings Banks Association. The Supervisory Board sees no reason to raise any objections against the management and the financial statements that were presented. The Supervisory Board approved the annual financial statements as prepared by the Board of Management at today's meeting. The annual financial statements have thus been adopted pursuant to section 172 AktG. Under the control and profit transfer agreement, the net income for the 2025 financial year before profit transfer, as reported in the annual financial statements, is transferred in full to HASPA Finanzholding without requiring a resolution of the General

Meeting as to the appropriation of net retained profits.

The Supervisory Board also reviewed the non-financial report (Sustainability Report). In doing so, it took into account the findings of the review of the report conducted by the Compliance division. The audit did not lead to any reservations.

At the end of 31 December 2025, Mr Stefan Forgé stepped down from the Supervisory Board upon reaching retirement age. Mr Forgé guided and supported the development of Hamburger Sparkasse AG for many years in a spirit of consistently constructive and loyal cooperation. The Supervisory Board would like to thank Mr Forgé for his dedicated and commendable work. Effective 1 January 2026, Ms Christina Kurth succeeded Mr Forgé as his elected substitute member on the Supervisory Board.

The Supervisory Board expresses its gratitude and appreciation to the Board of Management and to all employees of Hamburger Sparkasse AG for their great personal dedication and successful work in the past financial year. The Supervisory Board also thanks the works council for the good and constructive collaboration.
